Northeastern University class of 1999, Congratulations on all of your individual achievements. Five years ago you were all unfledged, yet promising adolescents, this year you leave Northeastern as accomplished, "mature" adults. Take with you the knowledge you have attained, the experiences you have shared and the memories you have collected. Learn from your past and future mistakes. You have come a long way, but the journey is far from over. There are no limits on what you can acheive. Take chances and take care.

Congratulations,
Kathleen Ann Igo
Editor-in-chief, 1999 Cauldron

CLASS OF 1999 SENIOR PORTRAITS
are now being scheduled for
YOUR CAULDRON YEARBOOK
CALL 1-800-OUR-YEAR TODAY. (DON'T BE LEFT OUT!)

Don't Ever
Accept Less
In Service
In Value
In Life

I've learned that....

-it takes years to build up trust, and only seconds to destroy it.
-it's not what you have in your life but who you have in your life that counts.
-you can get by on charm for about fifteen minutes. After that, you'd better know something.
-you can do something in an instant that can give you heartache for life.
-no matter how thin you slice it, there are always two sides.
-it's taking me a long time to become the person I want to be.
-it's a lot easier to react than it is to think.
-you should always leave loved ones with loving words. It may be that last time you see them.
-we are responsible for what we do, no matter how we feel.
-either you control your attitude or it controls you.
-regardless of how hot and steamy a relationship is at first, the passion fades and there has to be something else to take it's place.
-learning to forgive takes practice.
-there are people who love you dearly, but just don't know how to show it.
-my best friend and I can do anything or nothing and have the best time.
-true friendship continues to grow, even over the longest distance. Same goes for true love.
-just because someone doesn't love you the way you want them to doesn't mean they don't love you with all they have.
-maturity has more to do with what types of experiences you've had and what you've learned from them and less to do with how many birthdays you've celebrated.
-no matter how good a friends is, they're going to hurt you every once in a while and you must forgive them for that.
-it isn't always enough to be forgiven by others. Sometimes you have to learn to forgive yourself.
-no matter how bad your heart is broken the world doesn't stop for your grief.
-just because two people argue, it doesn't mean they don't love each other. And just because they don't argue, it doesn't mean they do.
-we don't have to change friends if we understand that friends change.
-you shouldn't be so eager to find out a secret. It could change your life forever.
-two people can look at the same exact thing and see something totally different.
-there are many ways of falling and staying in love.
-no matter how many friends you have, if you are their pillar you will feel lonely and lost at the times you need them most.
-your life can be changed in a matter of hours by people who don't even know you.
-the people you care most about in life are taken from you too soon.
-although the word "love" can have many different meanings, it loses value when overly used.

~Learn from the lessons life teaches you.~

President Richard M. Freeland

"By the time the Northeastern student graduates, they are much clearer about what they want to do with their lives. The employers who hire our graduates after they finish here reinforce the idea that there's something special about Northeastern students."

Northeastern
UNIVERSITY

Office of the President
110 Churchill Hall
Northeastern University
Boston, Massachusetts 02115-5000

Phone: 617.373.2101
Facsimile: 617.373.5015

To the Class of 1999,

As the first graduates of Northeastern's second century, you assume a unique place in the university's remarkable history. So it is with special pride and pleasure that, on behalf of the faculty and trustees, I congratulate you on reaching this milestone in your life and wish you every success on the journey that lies ahead.

As you leave Northeastern, I hope you will see your years here as the beginning of your learning, not the end. There will always be more to know, deeper levels of understanding, higher levels of performance. I hope you will keep growing and keep searching for knowledge, because to stop learning is, in a deep sense, to stop living.

I also hope you will seek wisdom and compassion even as you pursue knowledge and skill. As you discover, make use of your findings. As you learn, teach. As you succeed, share. What you have acquired during your years here can make your neighborhood and all the world a better place.

I hope, too, that you will keep a place in your heart for Northeastern. You have earned a permanent place among us. We want to be a continuing part of your life and to continue contributing to your growth. You are joining a great community of graduates that links generations over the past century. With you now in the vanguard, this university -- this family of Northeastern -- will flourish anew in the century that lies ahead.

Sincerely,

RM Freeland

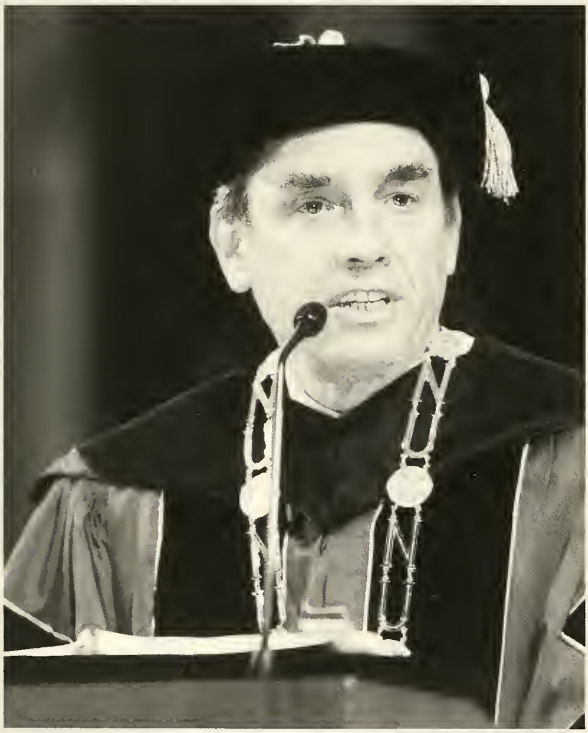
Richard M. Freeland
President

AN INTERVIEW WITH THE BOSS

President Richard M. Freeland

Cauldron: You probably get this question all of the time, but what do you see as your primary role as President of Northeastern University?.

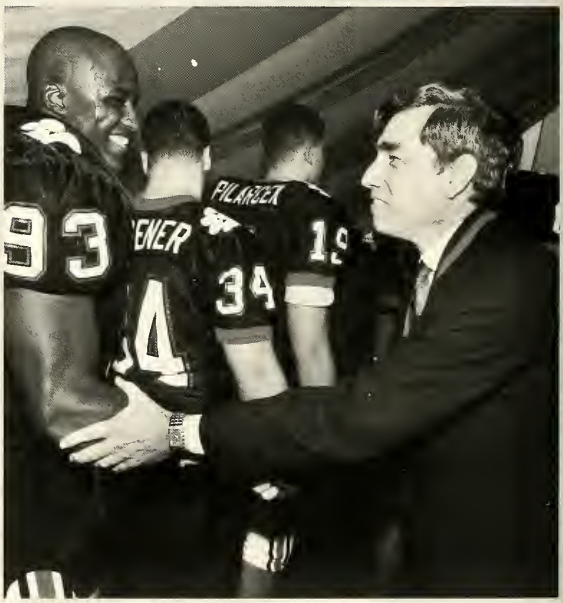
President Freeland: *"My role is President of Northeastern University, an institution with its own particular history and character. If I had to summarize my most important responsibilities, they are three. First, to provide a vision and direction for the university for the future, drawn on our history, our values, our character, and our mission. This vision provides the institution, its faculty, staff, students, and trustees a sense of our future possibilities. Of all the things I do, that is the most critical, because I am the only one in a position to do that. Second, I must create the organizational capability to achieve the vision I have laid out. That*



involves selecting key people for responsible positions and organizing them in such a way that their talents are used in the best possible way to advance this vision. Third is making sure that the institution and the people it puts in place have the resources they need to do their jobs, and that means worrying about fundraising, worrying about sponsoring research to get grant support from government agencies and corporations, worrying about tuition and how much we charge students and our enrollment goals."

Cauldron: Does your role differ from presidents of other universities?

President Freeland: *"I think it differs in all sorts of ways. I think if you were to ask most presidents about their responsibilities, they would offer some version of the three responsibilities I have just summarized. Creating a vision of Northeastern's direction over the next decade requires an understanding of where we've been, such as our history with co-op, how important it is and how it might be strengthened. We focus*



on aspects that are specific to the academic marketplace of Boston. You could spend the next ten years doing something that's specific to Northeastern University."

Cauldron: What sort of opportunities do you think Northeastern students have that differ from normal four-year institutions?

President Freeland: *"There's no question that Northeastern is a very distinctive form of education that presents unique opportunities that are*

(continued on next page)

reinforce the idea that there's something special about Northeastern students because they've had this special opportunity. I believe that Northeastern students are real fortunate."

Cauldron: We've heard that, due to budgetary constraints, the school has re-evaluated its teacher's salaries. How will this affect Northeastern's ability to draw the best academics and careerpersons into the fold as educators?

President Freeland: *"The most important dimension of the university budget is the salaries of our faculty because it determines our ability to get quality people. I pay a lot of attention to the competitiveness of our salaries. We did a major study of this last year through the Office of University Planning and what we learned was that our salaries are competitive. If they weren't, I'd invest every marginal dollar in salaries, but my conclusion from the studies we have done is that our salaries, discipline by discipline, rank by rank, are competitive. I don't think it's accurate to say that budgetary constraints have caused us to reduce. It is true that in the early 1990s, when Northeastern University was in a real budgetary crunch, we went through some years when we didn't have salary increases and that caused us to lose some ground in comparison to other universities who weren't quite so adversely affected. But we feel we've made that up in the last two or three years with regular salary increases. I think that right now we're in good shape. I'm not aware of any faculty hires that we wanted to make that we didn't make due to salary."*

Cauldron: In terms of making this school as comfortable as possible for all students, what steps have this school taken to accomodate such a large student population? Have we forgotten certain groups?

President Freeland: *"I think the most important thing about student life at Northeastern is the transition we're making from a commuter campus to a more residential one. In the recent past, the amount of students who've lived on campus has been very limited. Alumnae from as late as ten years ago will tell you that there is no student life at Northeastern. We now have a significant number of students who live on campus, about 85 percent. The biggest thing we've done to enhance the quality of student life is by making our campus a residential environment. We're working actively to get students who live on campus to participate in extracurriculars: the clubs, organizations, et cetera. Each year, they get a little stronger and more active. I think that student life is much different than it was ten or fifteen years ago and it's just going to get better."*

(continued from page 8) *nonexistent at most other universities. Northeastern specializes in practice-oriented education. Typical students in conventional four-year institutions take 40 courses and study for four years and they're very smart people, but then they go out into the world to find out what the relationship is between education and adult life, and they realize that they want to do something else with their lives. The great advantage of practice-oriented education is that students have the opportunity to make these assessments at Northeastern as part of their educational experience. They obtain real world experiences through co-op in the kinds of settings that they are preparing for in classes. By the time the Northeastern student graduate, they are much clearer about what they want to do with their lives. The employers who hire our graduates after they finish here*

The Best of the Best

Northeastern's Excellence in Teaching Award Winners

Geoffrey Davies
Chemistry

What Makes NU Special

"The students are wonderful. Some of the students I taught in England were at elite schools and they thought they could just sit there and get it all. Northeastern students are different. You turn the lights on and they're ready to go."

Dream Job

"This one. I love Northeastern and I love the students. It's a privelege to be a teacher and I feel like the students are honoring me by coming to my class."

My Students Say I'm

"Stupid. A lot of students don't like chemistry; it's hard. The way I get them to go along with me is I tell them that chemists don't know a lot. Then I have to convince them that its' useful, interesting and something they won't just forget."

(interview courtesy of the Northeastern Voice)

Geoffrey Davies

Matthews Distinguished University Professor

A Matthews Distinguished University Professor of Chemistry, Professor Davies has been an example to his colleagues, achieving a successful balance between research and teaching. He teaches a variety of undergraduate and graduate classes, ranging from General Chemistry to Modern Methods of Analysis. He serves as the Associate Director of Northeastern's Barnett Institute of Chemical Analysis and Materials Science and has authored over 200 research publications. His research interests center on environmental materials and catalysis of the reactions of small, abundant molecules, contributing to important advances in the study of humic substances. Especially with his freshman students, Professor Davies emphasizes strong writing skills and early exposure to research. In his classes, he pays particular attention to freshman students who may have encountered difficulties with math and science in the past, inspiring an appreciation for scientific principles in non-science majors. In addition, Professor Davies is a member of the American Chemical Society and a Fellow of the Royal Society of Chemistry.

The Best of the Best

Northeastern's Excellence in Teaching Award Winners

Tom Gilbert
Chemistry

Most Memorable Teaching Experience

"We covered a very new advance in a class on analytical instruments and one of the students used it during her next co-op. When she told her supervisor that we'd talked about this brand-new instrument in class he nearly fell off his chair."

Celebrity Who'd Make A Good Teacher

"Director/producer George Lucas. You have to know your audience, how to hold their attention and then essentially tell them stories and teach them lessons. I can't think of anyone better at doing just that."

Person You Admire

"Thomas Jefferson. He was a scientist, inventor, architect, statesman. That kind of breadth is remarkable. I just love that multi-facted approach to life."

(interview and photo courtesy of the Northeastern Voice)

Tom Gilbert
Associate Professor

Both science and non-science majors are surprised by Professor Gilbert's ability to apply Chemistry to real world applications. Whether it is through his Final Jeopardy bonus point quizzes or by holding office hours at the infamous Chem. Central, he makes every effort to make it clear that he cares about each one of his students. Many of his students are suprised on the first day of class when he asks for the first assignment--for each student to submit electronically their resume and a photo. He does this so he can connnect names and faces and have a better understanding of his students' interests. He then incorporates these interests into the material that he is teaching. He challenges his students in the classroom by taking to a question and answer format for teaching rather than a "sage on stage" approach. Rather than focusing on "chemical accountancy" and rote memorization, Professor Gilbert emphasizes the importance of understanding why chemical principles occur. Outside the classroom, he has also demonstrated a strong interest in improving science education and experiential education at Northeastern.

The Best of the Best

Northeastern's Excellence in Teaching Award Winners

Carla Oblas
Mathematics

Inspiration for Becoming an Educator

"Girls were supposed to be teachers, so it was the last thing I wanted to do. But in graduate school I did some teaching in inner-city schools and I loved it. I loved listening to the students. It was a hoot."

Most Memorable Teaching Experience

"Witnessing former Balfour Academy students graduating from college. I'm so proud of them."

What Makes NU Special

"Its urban setting, its students and its outreach mission. This is a place that embraces a lot of non-traditional students."

My Students Say I'm

"Enthusiastic and a little crazy. I'm sure they wonder how someone can get so excited about math."

(interview and photo courtesy of the Northeastern Voice)

Carla Oblas
Clinical Assistant Professor of Mathematics

With her research efforts focused on innovations in mathematics education, it is no wonder that Carla Oblas is being recognized this year with the Excellence in Teaching Award. Upon joining the Northeastern faculty in 1981, Professor Oblas began her work in modifying traditional mathematics teaching principles by rewriting algebra review classes. Her work in this area has resulted in two books, "Algebra: Create and Discover" and "Problem Solving and Algebra Too". Instead of focusing on merely mathematical rules, her textbooks emphasize learning mathematical concepts first. She really cares about her students understanding the applications of math in everyday life. Her Interactive Mathematics class has been a welcome respite for students who have traditionally encountered difficulties with mathematics. This class emphasizes problem-based learning through group work in which students examine real-life situations and develop solutions. Professor Oblas' strong student-centered approach to teaching has also been evident in her involvement with Northeastern's Balfour Academy.

The Best of the Best

Northeastern's Excellence in Teaching Award Winners

Stephen Reucroft
Physics

Most Memorable Teaching Experience

"When explaining something very tricky and I can see it connecting with students, I see their faces lighten up as they get it. It's a really good feeling when that happens."

What Makes NU Special

"It's a very unpretentious university. It doesn't try to be a British university; its very American. It's its own place."

My Students Say I'm

"They don't tell me. I'm sure they tolerate me and think I'm eccentric."

Person You Admire Most

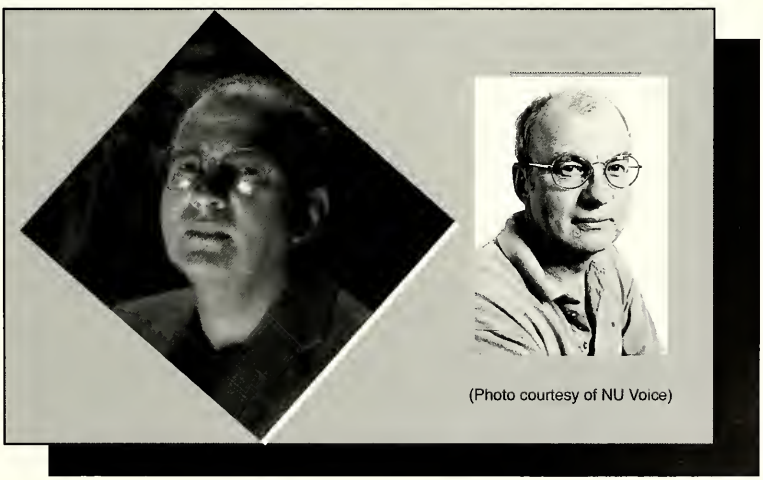
"Robert Fripp, guitarist for the avant-garde rock band King Crimson. The best rock guitarist ever, and nobody's heard of him. It must be very hard to be ahead of your time."

(interview and photo courtesy of the Northeastern Voice)

Stephen Reucroft

Matthews Distinguished University Professor of Physics

An accomplished researcher and a dedicated professor, Stephen Reucroft has set an example for his fellow faculty members with his ability to juggle both roles. Professor Reucroft is one of the university's premier faculty researchers and has received over thirty million dollars in funding for his research in major particle physics. He is currently working on a CMS experiment at CERN that is funded by the National Science Foundation, heading a team that includes researchers from eight other universities. With so many research accolades, one would expect his students to be somewhat intimidated. Any intimidation in his students disappears fairly quickly with Reucroft's amazing ability to apply physics concepts to everyday life. Some are also surprised to learn that such a distinguished scholar willingly teaches introductory physics classes to non-science majors. His passion for his field spills over into the classroom as he teaches his students and is always willing to lend a hand. In addition to his classroom activities, Reucroft works with the NSF Research Experiences for Undergraduates program that provides U.S. undergraduates the opportunity to work at CERN.



(Photo courtesy of NU Voice)

The Best of the Best

Northeastern's Excellence in Teaching Award Winners

Richard S. Swasey, Jr.
Finance

Most Memorable Teaching Experience

"After a corporate training session, I met the students after for a drink and they greeted me with the poem 'O'Captain! My Captain!' from 'Dead Poets Society'. I'll never forget it."

Person You Admire

"My wife. All the work she has to do to take care of me. [Swasey is partly paralyzed in his neck and back.] And she holds a demanding corporate job. She's an incredible, special person."

What Makes NU Special

"A lot of the students embody the traits of a husky, they're tenacious and doers."

Celebrity Who'd Make A Good Teacher

"Comedian Bill Murray. Comics like to please people, they're entertaining and people have to understand their material to get their act."

(photo and interview courtesy of the Northeastern Voice)

Richard S. Swasey, Jr.
Lecturer

Since joining the finance and insurance faculty in 1996, Professor Swasey has made an impact on the lives of students. When students take one of his finance classes, it is quite clear that Swasey cares about them as an individual. His philosophy of teaching emphasizes "teaching the whole student" rather than merely subject matter. Accordingly, he arranges lunch sessions with his students on a regular basis as a means for getting feedback about his class and as an opportunity to engage his students in the learning process. Professor Swasey is also strongly committed to showing the connection between finance and practice. To achieve this balance, Swasey frequently hosts "public service announcements" in his classes covering topics such as establishing credit, planning your finances and preparing for retirement. His efforts outside the classroom also tie into his teaching experiences as he works in outside corporate financial training and in developing case studies that can be used in class. His student centered approach to teaching has made Professor Swasey a clear favorite of many finance students.

(Photo courtesy of NU Voice)

The Best of the Best

Northeastern's Excellence in Teaching Award Winners

Jerome Tapper
Engineering Technology

Inspiration for Becoming an Educator

"I was a mid-quarter teaching replacement in an evening course and the students were very suspect about changing instructors. But I told them they could vote at the end of the first class whether to keep me. They were excited and engaged by the end of class and assured me that they wanted me back. It was wonderful."

Person You Admire

"My wife, for seeing me through graduate school. For three years I was doing homework every weekend and she was there for me and my family. She is extremely precious and special. This award should be shared with her."

Dream Job

"This is it. It's the most satisfying and rewarding job I've ever had."

(interview courtesy of the Northeastern Voice)

Jerome Tapper
Associate Academic Specialist

Those who have had Professor Tapper know from day one what is expected from them. A Northeastern graduate, who worked in the industry in various roles as a chief engineer, project engineer, and consultant, he has had a major impact in bringing real world engineering applications to the classroom. Since coming to Northeastern in 1982, he has also been a leader in innovating the electrical engineering technology curriculum. Using his connections within the electrical engineering technology industry, Professor Tapper has been hard at work in establishing a state of the art Industrial Control Systems laboratory. Most importantly, though, Professor Tapper's students highlight his ability to challenge them and his willingness to help them in any way to succeed. This commitment to his students is evident in his teaching philosophy where he declares his goal to: "prepare students with the best academic education possible by imparting quality technical knowledge and doing so in a sensitive, caring, and understanding manner."

(Photo courtesy of NU Voice)

Changing of the Guard

New Leadership at Northeastern

David Hall

Provost

Coming from the School of Law, David Hall has led an inspired vision for institutional change in academics. Setting forth his goals for the upcoming year in his opening address back in September, Provost Hall urged the university community to focus on areas of the university that make Northeastern unique. His first provostial initiative centered around the university's commitment to co-operative education. Emphasizing the need for the integration of co-op experiences with academics, Provost Hall called upon the faculty to redesign the way in which they viewed co-operative education. By improving students' co-op experiences, Northeastern can continue in its tradition as the national leader in co-operative education. Provost Hall's second initiative was emphasized the need to improve the university's retention rate. The Task Force that he created to examine this issue was charged with presenting realistic yet ambitious retention goals for Northeastern's future. His third initiative focused on better defining Northeastern's unique access mission. In addition to these many initiatives, Provost Hall has also sponsored further examination of the transfer and adult and continuing education populations at Northeastern. In only his first year at the helm of the academic administration, Provost Hall has successfully captured the attention of the Northeastern community inspiring others to act to bring about institutional change.

(Photo courtesy of NU Voice)

"For me a provost is an **institutional guide** for those who are traveling down an academic path that is often dimly lit. A provost is a person who attempts to **facilitate and inspire institutional change**, and not someone who gets in the way of needed change. He/she must strive to be the **collective conscience of our academic vision**, when we get trapped in the silos of our individual unit's and department's needs.

A provost must be an **eloquent and strong advocate for academic needs**, and a sobering reminder of our academic responsibilities. He/she is that person who **must take the blame for our collective academic failures, and spread all the credit for our academic successes**.

The provost and the provost's office must embody a **spirit of candor** and intellectual rigor, but we must also manifest values of **fairness and compassion**. It is ultimately an act and role of thoughtful service to the academic mission of the institution."

---David Hall in first address to the university community as Provost

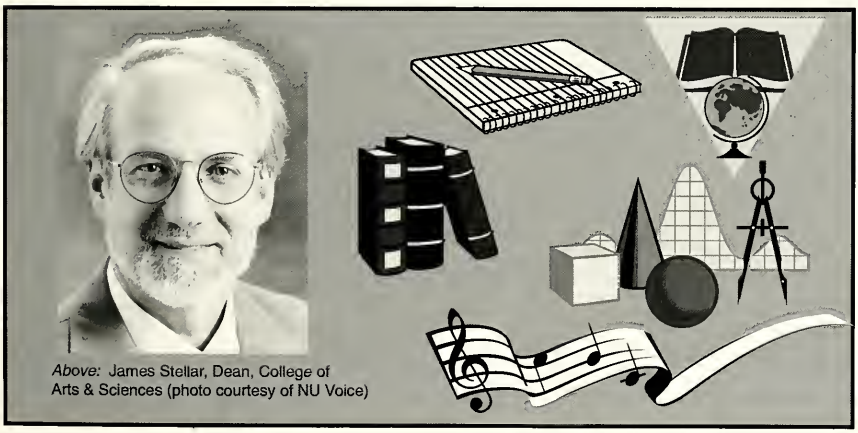
Changing of the Guard

New Leadership at Northeastern

James Stellar

Dean, College of Arts & Sciences

For those who have had the pleasure of being one of Dean Stellar's psychology students, it is quite clear that students are his first priority. Stellar's commitment to improving the quality of the educational experience at Northeastern coupled with his leadership within his department and as an associate dean, lead to his appointment in 1998 as the Dean of the College of Arts & Sciences. In his first year as Dean, he has challenged the faculty and staff within the college to tackle such difficult issues as education and teacher preparation, writing in the curriculum, and the integration of co-operative education and academics. This past year, the Center for Experiential Education was created to oversee service learning, internships and co-op experiences within the College of Arts & Sciences. Dean Stellar has also been a crusader for student involvement with faculty research efforts. He has several undergraduate students that play an active role in his own laboratory. In his adminstration, he has promoted faculty-student mentoring relationships. Even though he has assumed an administrative role, Dean Stellar has still managed to keep in touch with students, creating an Undergraduate Student Advisory Council and meeting with students through Open Forums on a regular basis. He has been a crusader for experiential education within the college, stressing the importance of such programs as study abroad, service learning, and faculty-student collaboration. Also among his goals for the future of the college is an increase in cross-college opportunities for double mabjors and minors.



Above: James Stellar, Dean, College of Arts & Sciences (photo courtesy of NU Voice)

"No member of the Northeastern faculty more fully embodies the values of a student-centered, research university. In selecting Professor Stellar we have turned to an individual who knows the College of Arts and Sciences intimately and who is committed to sustaining the pattern of recent progress that has so greatly strengthened the college's students, faculty and programs."
---President Freeland and Provost Hall in a memo announcing Stellar's appointment as Dean

"I hope to build on the very strong foundation that the previous dean has left. We are in good shape, attracting faculty. We continue to have better students. SAT [scores], applications and retention are up in the college. The college feels that the market forces are on its side.There are a whole variety of things that we can do to take advantage of the new leadership to make the college operate in a more open and fair way. With the change in leadership, we can take stock of this."
---Jim Stellar

(photo and interview courtesy of NU Voice)

Changing of the Guard

New Leadership at Northeastern

Patrick Plunkett

Acting Dean, Bouvé College of Health Professions

It has been a year of change for Bouvé College. A member of the faculty since 1975, Patrick Plunkett was appointed on January 1, 1999 to oversee the transition involved with the merger of the College of Nursing with Bouvé College. The new college came in the form of the new and improved Bouvé College of Health Professions. As Acting Dean, Plunkett has been active in developing new policies and procedures that will aid in this transition. The purpose of the merger was to align the industry trends with educational practices. This new vision for an integrated college came as result of recent trends in healthcare, where more and more healthcare professionals are working together in a team-based environment. In upcoming years, students from various health fields will be attending similar classes together, ideally sharing their individual areas of expertise with their fellow students. This interdisciplinary approach to education will be assisted with the recent contribution from Northeastern alumnus, George Behrakis, to be used to construct a state of the art health sciences building. In addition to his leadership activities, Dean Plunkett has also kept student interests at heart. Recognizing that this period of change may be confusing to some students, he, along with other Bouvé College administrators, have sponsored open forums for students to express their concerns or offer suggestions. This commitment to his students and faculty has made the transition process in Bouvé much easier.

"I am very pleased. It is a very big challenge. I feel confident that with support of the faculty the opportunities for creating a world-class college of health professions can be brought to a reality at Northeastern University."

—Dean Plunkett regarding his appointment

"All the benefits of the merger that we have been discussing for two years remain to be realized. Work on the new building continues apace. We have a moment now, as the values, programs and structures of the new college begin to take shape, to create something truly new in the field of health sciences education and research. Our common responsibility is to make sure that we take full advantage of this possibility."

—President Freeland and Provost Hall in a letter to the university community announcing Plunkett's appointment

(Courtesy of the Northeastern Voice)

Changing of the Guard

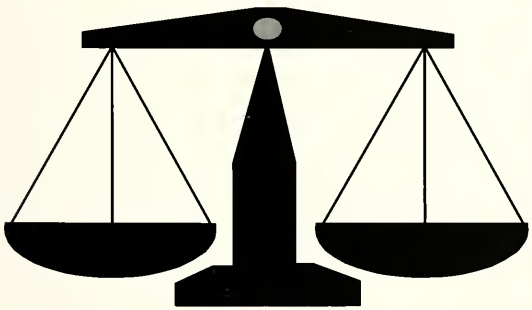
New Leadership at Northeastern

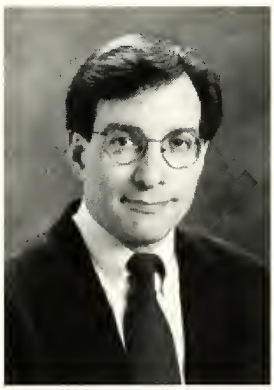
James A. Fox

Dean, College of Criminal Justice

After many years at the helm of the College of Criminal Justice, James Fox has decided to step down as Dean of the college in order to focus on his research efforts and teaching. In his tenure as Dean of the College of Criminal Justice, Dean Fox has brought the little college in Churchill Hall to national attention. His frequent appearances on nationally syndicated shows such as Oprah, 20/20, and Dateline have accomplished wonders in promoting the academic reputation of Northeastern. He was even profiled in a 2-part *USA Today* cover story, which dubbed him the "Dean of Death." A leading expert on serial/mass murder, juvenile violence, capital punishment, and statistical methods, Dean Fox has provided expert testimony to the United States Congress, President Bill Clinton, Vice-President Al Gore and Attorney General Janet Reno. In addition to being one of the university's leading scholars, Dean Fox also finds the time to work with his students. Whether it is in an introductory freshman criminal justice class or in an upper-level criminal justice elective class, Dean Fox's passion for his area of expertise inspires a love for criminal justice in his students. Using his connections within the industry, he helps upperclassmen and graduating seniors secure some of the best internships and job placements in the criminal justice field. While the administration of the College of Criminal Justice may be suffering a loss in the stepping down of Dean Fox, Northeastern students will still continue to benefit from his skills as he will hopefully be able to spend more time in the classroom.

"I think I've accomplished a lot in terms of elevating the college, particularly in the external community. At this point in the college's history there needs to be some hard work done in terms of redesigning the programs [in the college] and that's probably something that someone else can do better than me. "My greatest accomplishment is elevating the visibility and external profile of the college in both the political and media circles. We've seen a tremendous change in those [seven] years in terms of media interest in the college and the quality of the applicants we get."
---Dean Fox





"He has brought the college to national prominence as Dean," said assistant professor of criminal justice Jack McDevitt. "We're acknowledged to be the number one criminal justice program in New England. I look forward to working with him in the future just in a different capacity."
---Jack McDevitt

(photo and interview courtesy of NU Voice)

Changing of the Guard

New Leadership at Northeastern

Neal Finnegan

Chairman, Board of Trustees

Neal Finnegan took over this year as Chairman of the Northeastern University Board of Trustees. Finnegan, who succeeded former Chairman George Matthews, was a 1961 graduate of Northeastern's College of Business of Administration. Finnegan headed the $3.8 billion USTrust banking company, serving as president and Chief Executive Officer. An active member of the community, Finnegan is respected within the senior administration and among his fellow trustees. He is also a proven leader with a deep connection with the Northeastern community and student population. In his first year at the helm, Chairman Finnegan has ensured that the vision of a smaller, better Northeastern has been pursued. As Chairman of the Board of Trustees, Neal Finnegan has brought his strong leadership background and his support for improving Northeastern. Over the past year, he and the Trustees have provided guidance in the implementation of the co-op Call to Action. The Board has also been strong supporters of the university's attempts to improve retention rates from freshmen through seniors. Mr. Finnegan has also served an important role in the development of the Northeastern campus. Always an advocate for Northeastern, Chairman Finnegan was honored as a recipient of an honorary doctorate degree from the university during the 1998 commencement ceremony. His leadership has thus far proven to be strong as he guides the Northeastern Board of Trustees into the twenty-first century.

Above: Former Chairman Matthews with Finnegan

Right: Neal Finnegan, Chairman, Board of Trustees

"Neal is an outstanding person for the job. He's a great people person - he understands what makes people tick. He's compassionate. He has a great love of the students and of the university. He has great financial acumen. And he has outstanding leadership qualities."

---George Matthews, former Chairman of the Board in response to Finnegan's appointment

"He's deeply familiar with the issues and possibilities of the campus. He is respected by fellow trustees and senior administrators as well as by the business community."

---President Richard Freeland in response to Finnegan's appointment

Changing of the Guard

New Leadership at Northeastern

Call to Action

Objective #1: Systematically integrate co-op as an educational experience.

Objective #2: Create organizational structures for co-op coordinators that reflect the educational role of co-operative education.

Objective #3: Examine the role of co-op in enhancing in classroom experience.

Objective #4: Assure high quality service to students.

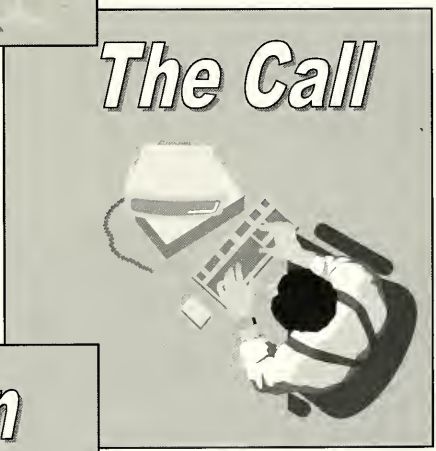
Objective #5: Provide students with access to full information on co-op possibilities.

Objective #6: Assure that co-op jobs offer high quality experiences at the best possible pay.

Objective #7: Assure the strongest possible relationships with co-op employers.

Objective #8: Take a fresh look at the structure and format of cooperative education at Northeastern.

Objective #9: Increase our understanding of our student's experiences.



New Co-Op Leadership Answers the Call to Action. . .

Richard Porter
Acting Vice President, Co-operative Education

Robert Tillman
Dean, Co-operative Education

The 1998-1999 academic year marked a time of transitional leadership for co-op. Vice President Porter was appointed in the fall of 1998 to lead the co-operative education department in its implementation of the Call to Action. Also during this time Robert Tillman, who previously served as a co-op coordinator, was appointed Dean. Together this leadership team has been responsible for chairing two task forces to make the changes promised in the Call to Action happen. To increase the interactionof co-op coordinators and academic faculty, the plan calls for co-op coordinators to be located in both at Stearns and in their academic departments. In order to facilitate this process, efforts this year have been focused on technology initiatives that will become available in the fall of 1999 when co-location begins. At that time, co-op jobs will be available on the web. Students will also be able to view their co-op coordinators' schedules and makes appointments online as well. In addition to improving service to students, the Call to Action also focuses on improving the quality of student work experiences, including relating jobs more to students' majors and offering better paying jobs. Under the leadership efforts of this duo, Northeastern will further set itself apart as a world leader in practice-oriented education.

(Photos and quotes courtesy of NU Voice)

"Rick Porter was selected because he has a demonstrated track record of outstanding academic and administrative leadership. He has also been very involved in trying to integrate co-op into the academic experience in the math department. He is a collaborative leader who is extremely thoughtful and listens to those around him."
"Strengthening the cooperative education program is a top priority for the university. It is an ongoing effort that must involve many people across the university, in the colleges as well as in the Division of Cooperative Education. We are honored to have professor Porter leading co-op during this period."
---Provost Hall and President Freeland announcing Porter's appointment as Acting Vice President

"[Tillman has a] depth of knowledge of cooperative education at Northeastern as well as his linkages with professional organizations created to address common issues in cooperative education."
---Provost Hall in a memo announcing Tillman's appointment as Dean

"There are going to be major changes to co-op that are going to take place in the next 18 months and I welcome the opportunity to lead the faculty as part of the division in those changes. It's clear that co-op is not going to look the same 18 months from now. And I want that process to happen as well as it can possibly happen."
---Robert Tillman after his appointment as Dean

New Faces

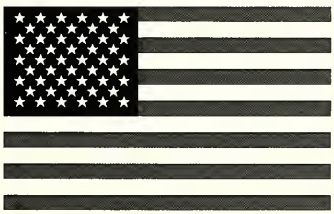
Advancing Diversity at Northeastern

With the help of the Student Government Association and the Council for University Programs, the Office of Affirmative Action and Diversity began the Study Circles program. This program provides students, faculty and staff the opportunity to further discuss issues that surfaced during last year's Dialogue on Race. By constructively discussing race issues in a facilitated manner, participants have the opportunity to confront issues from the start rather than letting problems build up. Hopefully, with a better means of communicating, participants will be able to keep the discussion of race relations active.

Donnie Perkins

Dean, Director of Affirmative Action and Diversity

Filling a post that had been left vacant for more than a year, Donnie Perkins stepped into the position of Dean and Director of Affirmative Action and Diversity in the fall of 1998 during a time of controversy. He faced a university struggling to come to grips with the question of race relations. In response to this demand for a mechanism to discuss these issues, Dean Perkins worked with the faculty, staff, administration and students to implement the Study Circles program. In its first year under a trial basis, the program provided a constructive means by which the Northeastern community can talk about and resolve these differences. He has also been active in the assessment of Northeastern's attempts to recruit a diverse background of faculty and staff that is representative of the student population here at the university. In addition, he has indicated an interest in working with the SGA Vice President for Student Affairs in the creation of an Affirmative Action Student Advisory Board that will act in an advisory capacity with issues concerning affirmative action and diversity.



Notable Faces at Northeastern

The Best and Brightest at NU

Above: *Ed Bullins, Professor of Theatre.*

Ed Bullins

Theatre

Since arriving at Northeastern, Professor Bullins has placed the Theatre department on the map. He is a leading scholar in current black theatre. This past November, he was awarded the Outstanding Pioneer Award at the 26th Annual Vivian Robinson AUDELCO Recognition Awards in New York City. In December of 1998, Professor Bullins was a guest of the National Black Theatre and New Federal Theatre at the Ruby Dee & Ossie Davis Foundation, Inc., 50th Anniversary Celebration & Community Theatre Benefit, that was attended by such greats as Maya Angelou, General Colin Powell, and Della Reese. Bullins has also authored numerous plays including A Son, Come Home, The Electronic Negro, and Clara's Old Man.

Cheryl Murtagh

Women's Field Hockey Coach

In her 11th season as Head Coach of the Northeastern Women's Field Hockey team, Cheryl Murtagh deserves to be recognized as one of Northeastern's best staff members. Her teams have won more than seventy percent of their games, making nine NCAA tournament appearances, including three Final Four appearances. In the eight years that the America East tournament has been around, Murtagh has led the team to six championships, finishing a close second in the lost matches. During 1997, she took home Northeast Region Coach of the Year honors for the second time in addition to her 150th career win.

Above: *Cheryl Murtagh, Head Coach of the Women's Field Hockey team (photo courtesy of NU Athletics).*

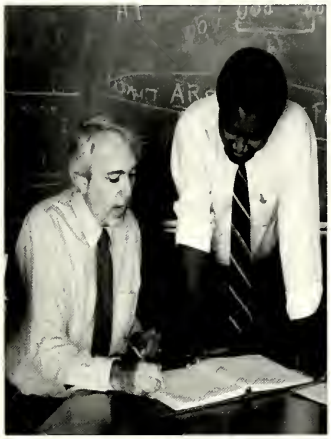
Notable Faces at Northeastern

The Best and Brightest at NU

Robert Case

Mathematics

In 1998, Professor Case was honored with Mathematical Association of America's Deborah and Franklin Tepper Haimo Award for Distinguished College of University Teaching of Mathematics. A leading advocate for teaching innovation in pre-college mathematics education, he has been integral in pedagogical developments that emphasize an active classroom where teachers act as facilitators. Professor Case's involvement outside Northeastern is also of merit. He has worked with the Boston Public Schools to introduce innovative calculus courses, forging a connection between Northeastern and the surrounding community. Also of note, Professor Case was a past recipient of the Excellence in Teaching Award and consistently receives high SGA Teacher Course Evaluation scores.



Above (left): *Professor Bob Case works with a student.*

Above: *Professor Carol Warner works in her lab.*

Carol Warner

Biology

During the last year, Carol Warner was honored with a Matthews Distinguished Professorship for her work with the ethics of human cloning and multiple pregnancies. Since she began working at Northeastern in 1988, she has received $3.5 million in grant money for her research efforts. Through her research with mice, Professor Warner hopes to find the preimplantation embryo development gene (PED) in humans. This gene plays an early part in embryonic development and can determine whether or not the embryo will live or die. In the long run, she hopes that her research can be used in developing new treatments for infertility and contraception.

Delta Zeta
ΔZ

It all began with 10 little tau sisters who wanted to form a sisterhood. They introduced their idea to other girls, and thus set off on their quest to form an ideal sorority on the campus of Northeastern University. These four girls came to be known as the Alpha Phi Delta's. Unfortunately, they would come to find out that Alpha Phi Delta was a national fraternity, and so they changed their name to Gamma Phi Beta and continued on their quest. For the next year, these girls worked hard. They participated in numerous community service and school related activities. By 1989, these girls finally achieved their goal: they were recognized as a colony of the National Sorority, Delta Zeta.

The sisters of DZ are very proud of our graduating sisters! The seniors of Delta Zeta are Stephanie Craven, Michele Doherty, Leah Gamboa, Tina Lambert, Kerynne Livreri, Sandy Pan, Matti Reel, and Adrienne Weiden. We have a senior week every spring to celebrate these women and to let them know how much we appreciate their friendship, loyalty, and sisterhood. The week is composed of many special events, including ceremonies to honor and thank these sisters, and to wish them good luck in the future. Little sisters vow to keep their Big Sisters informed of DZ events after they graduate, and a video is made for each graduating sister containing special messages and photos from the chapter and their parents. Good luck, girls- we love you!

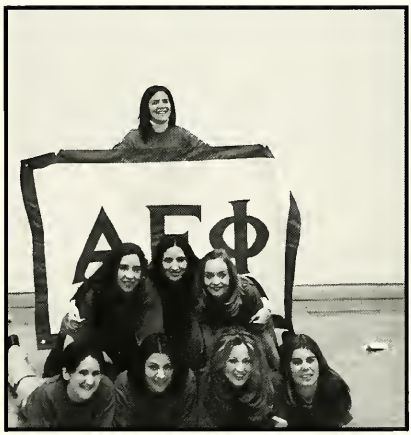
Chance made us friends, fate made us sisters.

Alpha Epsilon Phi
ΑΕΦ

Alpha Epsilon Phi was founded at Northeastern on May 6, 1990, by a group of women who saw a need for the Greek system to continue expanding and improving. Throughout the years, we have strived to form the everlasting bond of sisterhood. We have formed common goals by participating in various community service, campus activities and socials within the Greek system. Yet, we are a diverse sorority in nature. Trust, understanding, tolerance and love are the qualities of a true sister- an AEPhi sister.

Alpha Epsilon Phi was founded on October 24, 1909, by seven Jewish women at Barnard College, New York, N.Y. These women established many of our first traditions- our colors of green and white, the lily of the valley as our flower and our pin of pearls. Alpha Epsilon Phi's motto, Multa Corda Una Causa or Many Hearts One Purpose, and our insignia of the three columns Greek temple, have been part of the sorority since 1916. The giraffe was chosen as the sorority mascot in 1975 because it has the biggest heart and it stands above the rest of the animals. The national philanthropy of Alpha Epsilon Phi is Chaim Sheba Medical Center in Tel-Hashomer, Israel. Our community service efforts are focused on AIDS awareness and breast cancer.

AEPhi is sad to say good-bye to our 10 seniors- Rachel Blevins, Stephanie Evans, Rebecca Lehmann, Lisa Lyle, Jessica Murray, Jennifer Ockerman, Radka Opalka, Kimberly Santas, Elizabeth Schimenti, and Stacey Zuckerman. Class of '99, thanks for all the great times and memories. We will miss you and wish you the best of luck in all your future endeavors. You will hold a special place in our hearts where all our thoughts of Alpha Epsilon Phi are cherished and remembered. LML.



AEF will bring wonderful memories in the passing of time.
As sure as the sun rises, changes in your life will happen, as sure as the sun sets, things in your life never change.
Sorority sisters will always be; never separated by time or distance.

Sigma Sigma Sigma

ΣΣΣ

Sigma Sigma Sigma was founded on April 20, 1898, at Longwood College in Farmville, Virginia. Our eight founding sisters envisioned a sorority built on friendship, leadership, and activism. Today, over 100 years later, there are chapters that continuously have stayed true to the ideals espoused by our founders. Sigma Sigma Sigma centers its philanthropic efforts around the theme "RSigma Serves ChildrenS." Specifically through the Robbie Page Memorial to develop and support play therapy for hospitalized children, RPM was established following the 1951 death of the son of our fourth national president.

Sigma Sigma Sigma's flower is the purple violet. Our color is royal purple and white and our jewel is the pearl. Our symbol is a sailboat and the magazine is the Triangle of Sigma Sigma Sigma. Our motto is, "Faithful unto death". Last year during Tri Sigma's centennial convention our chapter received two Robbie Page Memorial Wards: largest RPM per capita and largest collegiate contribution. The senior of Sigma Sigma Sigma are Michy Hayashi and Julie Graham.

Theta Delta Chi
ΘΔX

Theta Delta Chi is a social organization whose members develop leadership, confidence, and responsibility though out their college experience. We are a blue collar fraternity, with emphasis on work ethic and a value system aimed at the betterment of individual members and the preparation for their post graduation years. The seniors of TDC are Dennis Bella, Anthony Falso, Dan McIntyre, Joe Rigano, John Scalcione, Peter Smith, John Scalcione, and John Wolfe.

Tau Epsilon Phi
ΤΕΦ

Many years ago, several friends made a very important decision in their lives. Their friendship had grown so strong they could consider each other brothers. This strong feeling of brotherhood is what motivated these friends to start the Kappa Zeta Phi chapter of Tau Epsilon Phi. Over the years, the numbers have grown, but the sincerity of friendship and brotherhood have remained unchanged. This strong sense of brotherhood is what motivates us to be the strongest fraternity on campus in eve ry aspect, athletically, academically, and socially. TEP at Northeastern University seems to be succeeding as we have won numerous national and campus awards including, Best Chancellor, and Best Educational Program among many others. Being the high achievers we are, we are not yet content with our accomplishments. We continue each day to strive harder and maintain excellence in all areas.

The seniors of TEP are Raymond Albanese, Brian Baker, Joshua Berlin, Brian Green, Christopher Oliveira, Justin Smith, and David Pacheco. Good Luck in all your future endeavors!

Sigma Phi Epsilon
ΣΦE

The Sigma Phi Epsilon fraternity was founded by twelve men at the University of Richmond, Richmond VA, on November 1, 1901. Sigep entered Northeastern's greek ranks on February 29, 1992. Currently Sigep Mass Eta is the only national fraternity chapter to be founded on a leap day. Sigep's official colors are royal purple, deep red, and gold. The official mascot of SFE is the cat in the hat in memory of a famous alumni, Theodore S. "Dr Suess" Geisel. Sigma Phi Epsilon's national philanthropy is Project America.

Sigep prides itself on it's cardinal points of virtue, diligence, and brotherly love. All of these points are outlined in our new membership program, the Balanced Man Project. The program is outlined by it's equal tier membership and lack of pledging. All brothers are on the same level and new members have the same rights and privileges of older members.

Sigep is graduating five seniors this year. Leaving us are Chaplain Frank Donofrio, President John Rahaghi, Vice President Mitchell Barber, Chaplain Brendon Cunningham, and Mathew Todd. All will be sorely missed and the younger brotherhood wishes them great luck in each of their obvious bright futures. HFF bros, we'll miss ya.

Pi Kappa Alpha
ΠΚΑ

Pi Kappa Alpha is a social fraternity, founded at the University of Virginia on March 1, 1868. The fraternity looks for men who represent our four pillars: scholarship, leadership, athletics, and gentlemanly behavior. We are one of the strongest national fraternities, with over two-hundred chapters in the United States and Canada. We have the largest average chapter size of any national fraternity, with more than 170,000 initiated members in our history.

Pi Kappa Alpha was colonized at Northeastern University in February of 1993. After a year and a half of hard work, our founders earned our charter on June 25, 1994, and we became the Kappa Delta Chapter. Since then, Pike has excelled in the Greek Community at NU, winning two Fraternity of the Year Awards, two President of the Year Awards, Homecoming, Greek Week, and countless others. We were also honored by our National Headquarters in 1996, when we were awarded the Robert Adger Smythe Award, which is given to outstanding chapters.

Currently, Pi Kappa Alpha has over fifty members and continues to be a force in the Greek Community and on Northeastern's Campus. We participate in community service projects benefiting St. Ann's Church, Greater Boston Food Band, the New England Aquarium, and the Jimmy Fund. In the past year, we won Homecoming, Greek Week, and the Intramural Softball and Broomball championships at Northeastern. We were also awarded an Academic Excellence award and a Chapter Excellence award from our National Fraternity. As this current class of seniors moves on into the real world, we would just like to pass on our tradition of excellence to our undergraduate members.

We would like to congratulate the following brothers on their graduation and wish them all happy and successful futures. You have all benefited the fraternity through your dedication and hard work, and we know you'll always keep your brothers close to your heart. The seniors of Pike Kappa Alpha are Stephen Blayey, Kevin Fraser, George Gal, Michael Kalpus, Curtis Keyes, Ryan King, John Nestor, Troy Shipley, Adam Sinel, Harris Solis, and Michael Toole.

Delta Phi Epsilon
ΔΦE

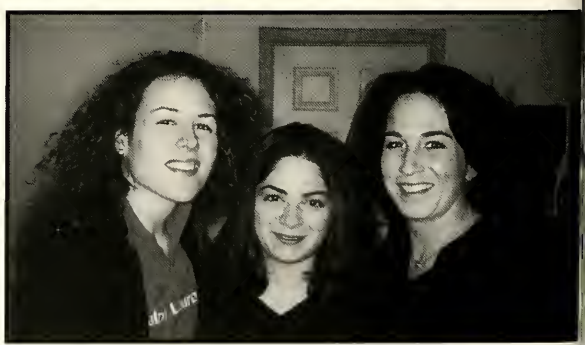
Delta Phi Epsilon was founded nationally at New York University Law School on March 17, 1917. It was the first non-sectarian social sorority and the only one founded in a professional school. Delta Phi Epsilon was founded at Northeastern University on March 19, 1969. We are the longest standing active sorority on campus. Delta Phi Epsilon is an international sorority with chapters throughout the Unites States and Canada. Our Philanthropies are National Cystic Fibrosis Research Foundation, Anorexia Nervosa and Associated Disorders and the Delta Phi Epsilon Scholarship Foundation.

Our colors are Royal Purple and Pure Gold. Our flower is the lovely purple iris and our mascot is the unicorn. Our national nicknames are D-Phi-E and Deephers. Our pearl program based on the 5 S's are sisterhood, scholarship, service, social, and self. Some of our recent events include working with Habitat for Humanity, Couch Potato-a-Thon for the Jimmy Fund, Stair Climb for Cystic Fibrosis, Face painting for a holiday party, and volunteering at the Veteran Us Shelter. Delta Phi Epsilon's senior are Andrea Antonucci, Sarah Bartoldus, Carey Glines, Kathleen Lane, Elizabeth Piver, and Pauline Trimmis.

Sigma Delta Tau
ΣΔT

Sigma Delta Tau's Gamma Mu chapter was founded here at Northeastern University on June 8, 1989. Our symbol is the torch and our motto is, "One Hope of Many People." SDT's national philanthropy is the prevention of child abuse.

This year our chapter is graduating nine of our oldest sisters, members of the Kappa, Lambda, Mu, and Nu pledge classes. These sisters have held many positions within our chapter and the Panhellenic Council through the years. They will be missed! The seniors of Sigma Delta Tau are Jen Baker, Chiara Berti, Natalie Corvacho, Cassie Falco, Erica Lucas, Kristi Rahn, Yara Turki, and Jen Winston. Good luck to all our seniors!



Kappa Sigma
ΚΣ

The Xi-Beta Chapter Of Kappa Sigma at Northeastern was colonized on May 2, 1992, and founded on March 4th, 1995, by a couple of students who wanted to put together a fraternal organization that would surpass all others. The years that have passed since colonization have given all our brothers a priceless gift that some may never be lucky enough to receive. Throughout the years, our biggest asset has always been our Brotherhood. The retention of alumni involvement is a testament to that. The future holds many great expectations for Kappa Sigma at Northeastern.

Our Brothers are well involved in their undergraduate efforts and in other extra-curricular activities. We look forward to repeating the success of last fall's fabulous pledge class, which have surpassed many of our expectations. Much of this year's success can be credited to our new District Grand Master Donald W. Jones Jr. to whom we're forever indebted to for the special interest he has taken in Xi-Beta.

Our alumni have remained faithful to their home chapter and have shown tremendous support to us. We, the men of Kappa Sigma at Northeastern, will continue to succeed in our drive to take Xi-Beta to the next level.

The seniors for the Kappa Sigma are Eric Woodard, Matt Lunt, Sergio Arturo Perez, Mike Moore, and Brian Griffith.

Sigma Gamma Rho ΣΓΡ

Kappa Nu Chapter was founded on April 27, 1984, at Virginia Beach, Virginia, by eight young women who were dedicated to the ideals of Sigma Gamma Rho Sorority, Inc., and they had many fresh and new ideas of their own to share. Since 1984, Kappa Nu Chapter has developed their unique style and has instituted many major programs: The March of Dimes, Project Reassurance; the Annual George Washington Carver Day Program; "Black Roses", A Tribute to Our Black Men, The Annual Freshman Packet of on and off campus locations for new students at Northeastern University; Project Acorn, an essay in conjunction with Mary McLeod Bethune Institute for young girls, and "Open Mic", where college students and non-college students can read poetry and freestlye to one another.

The women of Kappa Nu Chapter are working hard to maintain the goals and ideals of Sigma Gamma Rho Sorority, Inc. We work to implement permanent chapter programs in addition to our national programs to better serve our community. The seniors are Deidre DeGraffenreid and Tamika Harrison.

Always think positive and follow your dreams.

Beta Gamma Epsilon
ΒΓΕ

We are Beta Gamma Epsilon, Northeastern's oldest fraternity, founded in 1919. We are comprised solely of engineering and science related majors, an attribute that makes for a unique organization. We are located in the heart of Boston's scenic Back Bay. The house has many honors students, indicative of our awareness, of the importance, of scholastic achievement. A wide variety of tutoring is always available from upperclassman. A house computer and our updated file from previous quarters provide invaluable course material. If you are interested in finding out more about Beta Gamma Epsilon or fraternities in general please feel free to stop by and meet our brotherhood.

We are proud to boast of our eight graduating brothers. As Dan Winkler, Anthony Sacco, Brandon Levassur, Brian Prendergast, John Ferreria, Dave Lusigan, Roberto Burgos, and Mike Cooke join the ranks of our and Northeastern's alumni we wish them the best of luck in all of their future endeavors.

The torch still glows....

The Northeastern Chapter of the Association For Computing Machinery is on the cutting edge of technology. Dedicated to the advancement of knowledge, management and applications of modern computing, ACM serves as professional and service organization for students and faculty of computing science. In the past year, ACM has been active on campus, holding weekly meetings and inviting scholars and computing experts to Northeastern to broaden the insight and professional experience of its members. Reinstated in the Fall of 1998, the club has more than 40 members.

Asian American Engineering & Science Society

Educating their peers, promoting volunteerism and serving as mentors to novices, members of AAESS have had a tremendous impact on campus this past year. Through tutoring, peer mentoring and participating in social and educational activities, AAESS has left a mark on students on campus. Indeed, the group, which was founded only in the Fall of 1998, has extended itself beyond the Northeastern borders. In May, members of AAESS participated in the annual Walk for Hunger, a twenty mile hike throughout Boston to raise money for the city's hungry and undernourished.

THE American Chemical Society

Members of the NU's student chapter of the American Chemical Society serve their community, plan scientific meetings and provide a service to the chemistry department and the College of Arts and Sciences.

The group participated in the Northeastern Section of the ACS centennial celebration last year and organized a speaker series for the chemistry department colloquia series.

The ACS is a self-governed individual membership organization that promotes a better understanding of chemistry and the chemical sciences. The group also provides career development assistance and employment opportunities for students, professionals in academia and the private industry.

Additionally, ACS fosters communication and understanding between members, the chemical industry, the government and the community to enhance the quality of scientific research, support economic progress, and ensure public health and safety.

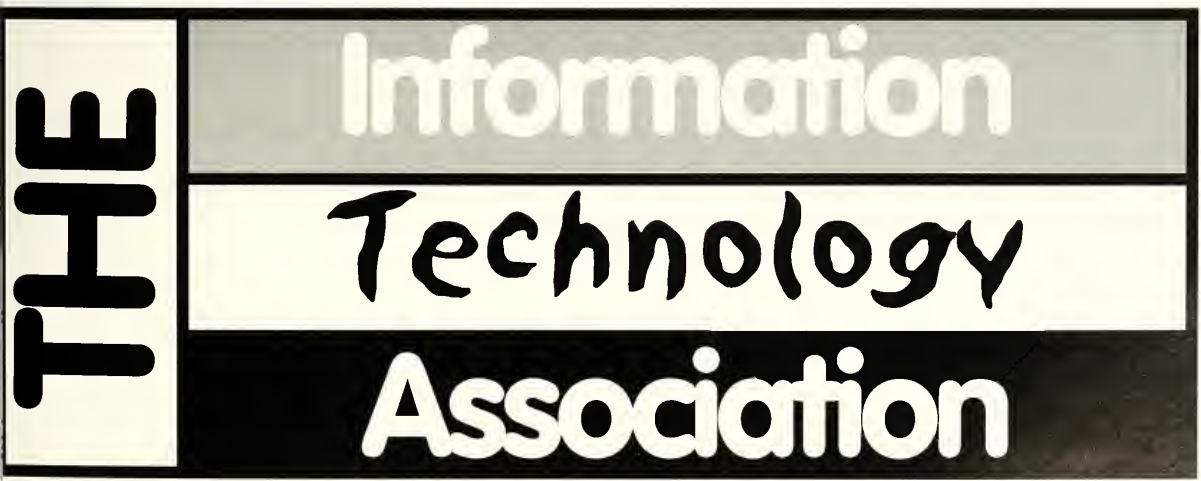
The Information Technology Association is a newly established student organization at Northeastern University. Established in June 1998, the ITA provides a forum for students with an interest in information technology.

Through ICS, students discuss the latest innovations in the technology field and they educate one another on a range of topics ranging from software packages to current developments to career opportunities in the field. The group's most notable event thus far has been a presentation encompassing Data Warehousing by COMPAQ Corporation.



INTERNATIONAL STUDENT FORUM

The International Student Forum was conceived in 1968 to enhance the image of the international community on campus, unite students of varied cultural backgrounds, and promote communication and understanding of cultural differences among the international and American student population at Northeastern. In the past year, ISF sponsored a range of social, educational and cultural activities, including camping trips, ski weekends, concerts, dinners and week promoting international students ISF is open to all Northeastern students regardless of race, religion, beliefs, sex, marital status, age, or national origin. The group, a special interest club, is located in 232 Curry Student Center.

CHINESE CHRISTIAN FELLOWSHIP

You may not know that Northeastern University has a Chinese Christian Fellowship organization. Actually, the group began meeting regularly since February 1994. In the past four years, the number of people in the fellowship has increased gradually. Some students think the Christian fellowship is only for Christians and is really boring. But in reality it's a real blast! Everyone is welcomed, including non-Christians. At the meetings participants share their faith and daily life. There are group grams, movie appreciation, "singspiration", praying, Bible study, and a host of outdoor activities. The group members' aim is to support each other throughout the college experience.

American Society of Civil ENGINEERS

Northeastern's student chapter of the American Society of Civil Engineers received its char ter on January 16, 1940. Since then, the chapter has played a vital role in promoting the professional development of civil engineers and the civil engineering profession.. In addition to hosting weekly lecture series, the group actively participates in such competition as the Concrete Canoe Competition, in which members build and race a canoe made of concrete. Each year ASCE members provide a service to the community. Last year, members modified the Freedom Trail map to include an alternate route for disabled persons, and earlier this year, they designed and constructed an accessible plot in the Fens Victory Garden. The chapter's parent organization, ASCE, is a national organization of Civil Engineers and was founded in 1848.

American Society of Mechanical ENGINEERS

Each year, students involved in the American Society of Mechanical Engineers carry out the mission of the chapter's parent organization, ASME, and serve their members, industry and government. At Northeastern, ASME student members meet weekly to discuss the latest issues in their field. They invite guests -- professionals in the industry-- to disucss topics in engineering. Members also participate in design contests, field trips and various community projects. ASME is an organization of 119,000 members. The society has 38 technical divisions which keep its members up-to-date on the latest engineering advances.

R.O.T.C.

(Top) The many faces of the cadets and cadre of Alpha Company, the small, but fiesty ROTC unit based at Northeastern, after a weekly training session in the Cabot Cage. The 1999 seniors, shown in Army grey shirts, participate in the training and oversee their fellow cadets.
(Left) Dave Henderson and Jessica Pesce, two cadets, prepare to lock and load ammunition into their M-16 rifles for a live-fire exercise at Fort Devens in Spring of 1998. **(Right)** Northeastern Army ROTC cadets show their colors in the unit's ceremonial color guard.

Top-left) The ROTC cadet Rangers, made up of both NU and BC students, receive honors for their performance at the Ranger Challenge competition, where they took second place in a grueling physical challenge against other schools from across the country.

Top-right) The victorious NU ROTC cadets stop to pose at B.C.'s Alumini Stadium after winning the 1-0 victory in the batallion football game vs. B.C. Company, which occurs every fall and ensures bragging rights to either team.

Above) Many NU & BC cadets got their first taste of rapelling during the fall 1998 Field Training Exercise at Fort Devens on the 60-ft wooden tower.

NU ROTC: leading the way with military excellence and education to train the best.

The Northeastern ROTC turns ordinary college students into US Army officers — encouraging them not only to be all they can, but to strive to improve.

The program challenges cadets with weekly training which tests their physical and mental endurance. It is to see if they can handle all types of pressure and ensures they can lead soldiers in any conditions.

The commitment involves showing up to exercise twice a week, becoming physically fit and interacting with upperclassmen, who run the program. Twice a year, the entire unit practices in an outside environment on a military base. This is the focal point of all other training and is usually the best and most memorable part of the year.

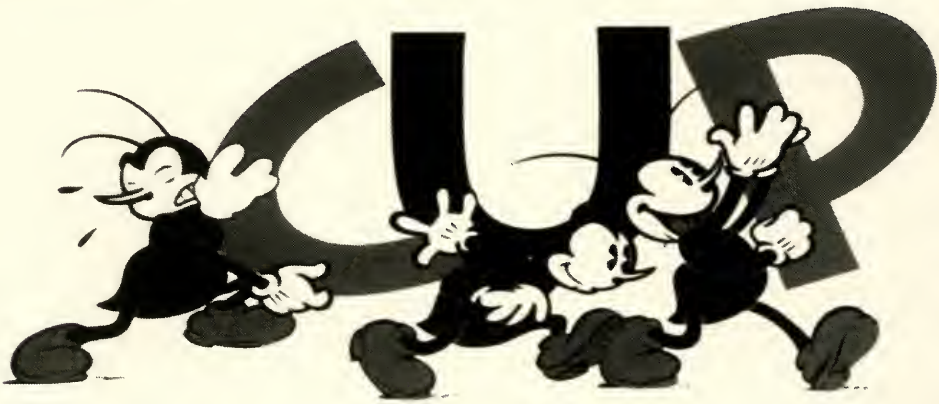
While cadets join the ROTC program for different reasons, they all have the opportunity to earn a scholarship which could pay for their tuition. Either way, ROTC builds character on a foundation of duty, honor and respect and allows people to learn more about themselves.

Council for Univ

Cultural & Diversity
Research, develop and implement programs that represent the diverse nature of the N.U. campus community.

Lectures
Work with agents, speakers, and their respective agencies to plan lectures, discussion series and panel discussions.

Special Events
Coordinate special events at N.U. This includes, but is not limited to, the annual Homecoming and Springfest celebrations.



STRIVING TO ENRICH THE NORTHEASTERN EXPERIENCE

Major Concerts
Research, plan and implement major concerts in Matthews Arena and at other large venues.

ersity Programs

Marketing
Serve as liaisons between C.U.P. and all media sources. Produce advertising and all promotional materials.

Film & Video
Selecting films and coordinate the quarterly film series. Also plan other events, such as midnight films, special screenings and sneak previews.

Entertainment
Coordinate and implement locally and nationally known comedians, comedy acts, performers, and unique events for N.U. students.

The Council for University Programs provided many exciting programs for students this year. We kicked off the year with an Alfred Hitchcock Film Festival, featuring three of his most popular films. C.U.P. brought Ethic Man to campus to discuss diversity & sponsored a Tekken 3 Tournament. The winner took home a championship belt. During the Centennial celebration, C.U.P. helped bring four bands to campus, including local favorite Rippapotomous.

If you didn't go to Homecoming this year, you are in the minority! Over 7,000 students attended these events. And C.U.P. was a big part it. The club sponsore many of the events for Homecoming this year, including the sub-eating contest, the pep rally, the float competition and the Homecoming King and Queen selection. C.U.P. was also responsible for the red and black paws distributed at the football game.

Thanks to C.U.P. "Real World" star Mohammed Bilal was on campus to talk about diversity and gave students the inside scoop on living with Puck. C.U.P. was the leader in establishing the Study Circles Program on diversity at N.U.

Throughout Winter and Spring quarters C.U.P. sponsored the Robin Williams Film Festival, featuring *Dead Poet's Society, Good Morning Vietnam, What Dreams May Come & Patch Adams.*

Springfest proved to be C.U.P.'s best event with Husky Olympics, N.U.'s very own "Lilith Fair", the 3rd Annual Fashion Show Extravaganza and a major concert.

Concerts on the quad were held every Monday and Thursday of the Spring quarter.

The entire board of C.U.P. would like to thank all the students who participated in our events this year and the student groups that helped to sponsor some of our events.

Thank you for your support.

CUP
COUNCIL FOR UNIVERSITY PROGRAMS

WRBB

The 1998-99 academic year saw great improvements for the WRBB community. We renovated our broadcast facilities by adding a brand new sound board to our on-air studio and we have done a number of other cosmetic improvements to our facility.

As we have done for over 25 years, Radio Back Bay (RBB) continues to broadcast an incredible variety of cutting edge music, the likes which cannot be found anywhere else in Boston. Keeping the programming standards set over the last two years, WRBB has had more students involved as DJ's during the 1998-99 year than in the last 15 years. The cultural variety has been maintained and the trends of popular music being introduced to Boston continue to originate at WRBB. We have completed a year of our nationally syndicated program "Sex, Drugs and Rock and Roll" and have expanded the markets (now 30 nation wide) which the program reaches.

WRBB provided coverage of the Huskies' sports teams and broadcast all home and a great number of away games of football, hockey, basketball, and baseball.

The WRBB staff and the executive board would like to thank the entire student body for their contribution, and solid support of WRBB's programming and status.

• Luca A. Amara, WRBB Student General Manager

Interpreting Club

The interpreting Club at Northeastern University has a mission and aim to provide students of American Sign Language and interpreting majors with the assistance they need on campus.

In addition to a very supportive and active membership, ICNU also relies on the help of the American Sign Language Department staff who provide the guidance needed in the field. Thanks to the vision and wisdom of advisers Dennis Cokely and Jim Lipsky, the Interpreting Club has been able to soar this past year..

Members began the year with pool and volleyball party and most recently held a coffeehouse on how multiculturalism effects an interpreting situation. This club is only two years old and has become very successful in sponsoring popular events.

Students for Evironmental Action was founded about 15 years ago and today, though small, is still going. Our mission is to educate and involve the Northeastern community in learning and participating in helping to protect our planet. Our main event each year is to celebrate Earth Day on campus. Our other activities include hosting a speaker series and taking environmental trips.

PHOTOGRAPHY Association

• President- Sarah Michonski •

• Treas.- Fritz Jaeger •

• V. Pres- Kelly Smith •

With their cameras in tow, students in NUPA make more out of simple things than most people would normally see. They go out in the city and take pictures, critique each other's work and share our photographs with the rest of the Northeastern community in shows and galleries.. Members in the group have been working hard in letting NU community know why they love what they do. The young photographers' work will be displayed in the quad during spring and summer quarters.

• Secretary- Sandee Buenavides •

The Pre-Law Society

The Pre-Law Society was established to assist any Northeastern student considering a career in law or law enforcement. The group met bi monthly, held tours of courthouses, and sponsored panel discussions that included the expertise of lawyers, judges and students. In addition, the group held informational sessions with law school admissions administrators and professors. Former attorney general Scott Harshbarger, who is a visiting professor in Criminal Justice, met with members in the society this winter quarter and is pictured here with the officers.

The Terra Society

The Terra Society is a geology club, which was formed in the 1970's. It has approximately 50 members, including a variety of people who are interested in understanding the environment and our physical world. The club provides an opportunity for students with similar interests to take trips to various environments and locations in the New England area. In the past year, the group sponsored a host of activities including hiking, mineral collecting and camping at mines, fossil localities and other sites. Other activities include annual trips to Applebrook Bed & Breakfast in New Hampshire and Moosehead Lake, Maine.

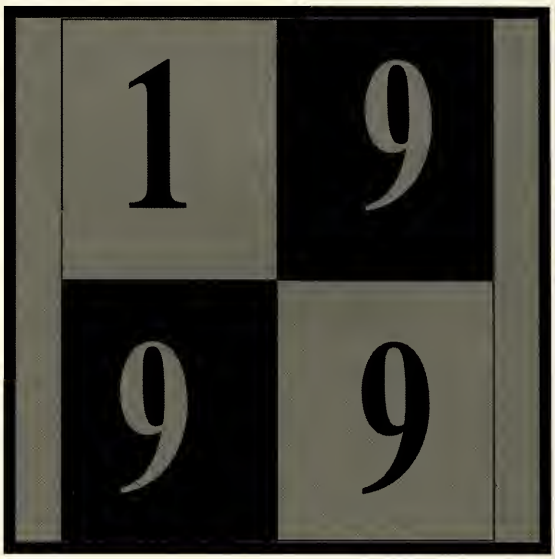
The Newman Club is the Catholic group on campus. We provide spiritual service and social opportunities to enable students to make connections with other Catholics. Our group's purpose is to create a setting where Catholic students can develop their personal and faith relationships with others.



Spectrum is the literature/arts magazine of Northeastern. We print the work of the freshest and most active literary and visual artists in the community. Spectrum fuses poetry, prose, drama and the visual genres to create a reflection on the state of the art.

Spectrum is the evolution of the NU Writer, a literary-arts magazine created in the late 1950s. Some of its original members are still involved with the community, most notably Joseph DeRoche who has been a teacher of literature and advocate for young artists for many years.

Currently the magazine's editor is Issam Zineh, but Spectrum is the culmination of the efforts of a creative, dedicated staff. They are responsible for maintaining the integrity and vision of the journal and fostering a supportive environment for university and community artists.

SPECTRUM

C.P.S. CLUB

Cardiopulmonary Science Club unites students so they will achieve their professional and personal goals. The four major aspects of the club are professional achievement, community service, social interaction and learning.

CPS purpose and mission are to assist students in learning the various aspects and current techniques in cardiopulmonarycare; increase awareness on the causes and prevention of cardiopulmonary disease; and provide opportunities for students to network with professionals in the field.

The CPS Club began in the spring of 1996. Each year the club holds blood pressure screenings at the Wellness Fair, sponsors quarterly professional development activities; identifies volunteer opportunities for students and host activities that bring CPS students from different years together.

INTERNATIONAL BUSINESS CLUB

Northeastern Student

The SGA has been hard at work this past year, representing students in all areas of the university. With over 50 senators, the Senate has tackled such issues as judicial affairs, teacher evaluations and the quality of the summer quarter. After years of lobbying by the Student Government Association, Northeastern also saw this year the extension of operating hours of the library and the ground breaking for a new residence hall to be opened in the Fall of 1999. Members of the association also represented Northeastern at the Conference on Student Government Associations (COSGA), held annually at Texas A&M University. As there will always be student concerns at Northeastern, SGA will be here to stay!

The Northeastern News

Article by John Quinn • Pictures by James Nash

Imagine what would happen if you combine the inhabitants of an asylum, the characters at any circus and the atmosphere of the Jerry Springer Show. It sounds like any ordinary Tuesday at The Northeastern News.

The members of the News are a highly-motivated, always-eclectic and often-misunderstood bunch who just want to put out the best newspaper they can. While we have an 80-plus year tradition to uphold, we redefine ourselves every Tuesday night. It's harder than it looks and takes more time than most people would think because they only see the final product.

Like any other skill, journalism takes practice, and the devoted staff puts in long hours in their fourth-floor office in the Curry Student Center. Many News staffers spend the bulk of Mondays and Tuesdays in the newsroom, stopping only to occaisionally go to class. Working for the News is an experience mere words can not express. To the unprepared observer, the staff seems to be rowdy, unapproachable miscreants.

After staying a while, we show our true colors as a fun-loving bunch. Each member of the staff hopes to hone their craft by writing, taking pictures or advertising. We learn by doing and teaching others, helping everyone strive to be better, thus making a better paper.

While most students see the paper on Wednesday, the News staff is busy throughout the week. They are driven by the thrill of reading their article in the paper — seeing their name at the top — uncovering the hidden facts of a story, shedding light upon a difficult topic and informing others of some great mystery on campus. Call it crazy, call it dramatic, but take us seriously be

ause we try to.

Each week our loyal writers are researching and writing the stories which make up the paper, accompanied by our eager group of photographers. They scurry around the campus armed with their notebooks and cameras trying to capture the weekly news and events as best as they can. They bring their stories back to the newsroom and spend hours typing their notes into the computers, whereafter the small, but devoted group of editors iron out the stories and make them publishable.

From there, the editors spend hours in laying out the stories and designing the many pages and sections of the news, which includes selecting pictures, writing headlines and making everything fit. We spend the bulk of every Tuesday in the newsroom, in between classes, perfecting our weekly issue. After the staff and editors of The News produce the paper on Tuesdays, it is shipped to Palmer, in the western part of the state, where it will be delivered to the little red boxes around Northeastern.

The Northeastern News is entirely run by students and is a financially-independent organization, fully-funded by our own advertising department. It publishes 10,000 newspapers per week for 35 weeks out of the year, pausing only for finals and extremely short vacations. The staff receives its training by working on the paper and learning from their editors as well as spending countless hours of being underpaid on co-op. Overall though, we are a teaching paper since none of our staff is permanent, leaving after graduation, and we teach and help any willing writer, photographer or ad guru.

The News accepts students from all majors, backgrounds and schooling, encourage all to stop by. Anyone interested in being part of the News can stop by our offices at 434 Curry Student Center — no experience necessary, just the desire to write and learn. So sit back, strap yourself down and pick up a copy.

The title of this book is "Shameless Plugs". The theme came from a combination of things, the first being Max Vitorin, last year's brilliant editor-in-chief's Centennial book. There is no doubt in my mind that Max is incredibly talented, but the staff and I got a kick out of the fact that his face is on the cover of the 1998 Centennial Cauldron. It's not the face of a former president or generous Alumni--it's the editor of the yearbook! A blatant self promotion. This shameless endorsement of himself coupled with the idea that the nineties; the high school and college years for most 1999 graduates, has been primarily about money, name brands, and capitalism.

This book was started VERY late! By the time we were able to get a new computer and the resources to start the book, it was March! I, along with a few key people, have killed ourselves to put together a book for the graduating class of 1999. I hope you all enjoy it. This is your book, Northeastern's Class of 1999. May you always remember the time you've spent at Northeastern. Congratulations and good luck in all you do!

To my staff and the people have helped out, thank you! First and foremost I would like to thank Caren Korin from DaVor and Chris Spelman from Jostens. I know that this is your job but you both have gone well beyond the call of duty to help me. Caren , not only our DaVor consultant but my confidant. Caren, you are a wonderful person! Thank you for all your help and support! Chris, you are certainly not a typical company representative. You certainly went the extra mile for us and all of your help is truly appreciated! I look forward to working with both of you next year, you are both great! John Sullivan, thanks for your work as Business Manager. Rebecca Lehman, my senior "advisor", thanks so much for all your help! You were the only senior to step up and help out and you were fantastic! You are a great person, congratulations and good luck in all you do! Jessica Bennett, my "shrink" and friend--thanks for staying in the office until all hours of the night and for keeping me from being in the office *too* much. You are a talented person and wonderful friend. Chuck Schauber, my work study turned "yearbook dork", thanks for all your help! Who would have thought we'd turn you into next year's business manager? Who's the dork now Chuck? I think we make a good team--next year is going to be very successful. Beth-Anne Dancasue, thanks for all your help. Even though you are tremendously dedicated to the SGA and involved

in other activities you managed to help the Cauldron and myself out tremendously. Thank you and congratulations on becoming next year's SGA President. You'll do a wonderful job! Eric Fischman, what can I say? You are quite a character. You always brought life to our dull little meetings! Thanks! Samantha Cook, thanks so much for all the time and work you put in to give me a hand. I can't thank you enough for working on the yearbook during the summer. You are quite talented in graphic design and I would love to have you help us out again next year, if you are interested (hint hint). Last but certainly not least--Cathy Connolley--you are a God-sent! Thanks for everything! I know that the last thing you wanted to do on your summer vacation was scanning yearbook pictures and proofing pages. You are awesome! I couldn't have asked for a better person to work with! Good Luck with your new job. I would love to hear that you were yearbook advisor at your new school! Thanks so much.

Thanks to Todd Shaver and Geoff Combs in the Student Activities Office! You were both there for myself and the Cauldron from the start--thanks! Thanks to Nicole and everyone in the Student Activities Office and Deirdra and everyone in the Business Office--I know I bugged you guys a lot but you had all the answers to my questions and were always willing to help! To everyone over at the Northeastern News, thanks for putting up with me--I know I bugged you every other day--well ok EVERY day to use your computers or scanner--but you never refused! John Quinn--thanks for all your advice and input and for just dropping by the office to chat...I hope you will help us out next year on YOUR yearbook! Jim and Brad, thanks for all the Sports pictures. You are both talented photographers and nice guys..thanks! Thanks to Adam Polgreen from Sports Information for all the pictures and James Divine from Mail Services for taking care of our mailings.

Special Thanks to President Freeland for granting us an interview and for encouraging the University to support the Cauldron. Thank you for your time and your assistance. Ms. Carol Taylor, Executive Assistant to the President, thank you for helping us get all the material we needed for the book and for being so cooperative.

If I have left anyone out, my sincerest apologies! Thank you to everyone who contributed to the Cauldron.

~ Kathleen Igo, Editor-in-chief, 1998-1999 & 1999-2000 Cauldron

NU ends season 5-6

The Huskies lost to Maine Nov. 21, ending the year with a 5-6 mark. It was a season full of highlights. Speedy sophomore wideout Dave Klemic broke a slew of long-standing team records, including the marks for scoring, receiving yards and touchdowns in a season. Junior quarterback Fred Vallett broke the school record for TD passes in a season, ending the year with 22. The Huskies will return all their skill position players on offense next year and many key members of the defense, including top tackler Brian Whitman and standout defensive tackle Doug Tillberg.

Future is bright for NU

Senior Ross Hainsworth ended his career at Northeastern by netting an overtime goal, and leading the Huskies to victory over Holy Cross. The score accounted for Hainsworth's 35th career point, good enough to place him third on NU's all-time scoring list. Despite the loss of Hainsworth, NU returns the bulk of its team next season, including leading scorer Almir Djurdjevic, who netted six goals, and goalie tandem Ryan Senkier and Allen Lewis.

Northeastern Huskies

Young Huskies look to next season

Northeastern's season ended with a loss to conference-leading Hartford at Sweeney Field. NU now looks forward to next season with high expectations due to the return of several experienced players. Leading the way next season will be 1998 Husky scoring leader, Kate Mercier, and captains Jodi Marak and Tara Regan. Just one member of the squad was a senior this season, captain Sarah Marquis.

Good Luck Seniors!!

Huskies make NCAAs a battle

By Sherlon Christie: NU News Staff

Northeastern's women's varsity eight went to the third annual NCAA women's rowing championship with a mission. Although the Huskies didn't come home with the trophy, their third place finish in last Sunday's Petite final (ninth overall) capped off a fairly successful year for NU coach Joe Wilhelm. Michigan won the Petite final in 6:51.79, BU was second in 6:53.79, followed by NU 6:55.39.

The message for the team, especially the departing seniors Comer, Perrone and Bratteson was simple, according to Wilhelm. "It is important to take ownership of that race because it will be the last race you remember for the rest of their life," he said. "We came here with something to prove from the losses at the Eastern Sprints and we did."

1st Year at NU: 1988

Top 10 Events of the 1998 Husky Field Hockey Season

- **#10: Sept. 12 - Huskies score first win at James Madison**

Frustrated by an 0-3 start, the team was determined to finish a four-game road stretch with a win. With four different players finding the net and rookie goalkeeper Kathleen Madaus making seven saves, the goal was met and the Huskies brought home an important 4-1 win.

- **# 9: Oct. 18 - America East triumph at Maine**

Competing against Maine is never easy, especially not when the team has to travel there first. Battling road weariness, senior forward Karrie Danilecki converted twice, including the game-winner with under five minutes remaining, to boost NU to a key conference victory.

- **# 8: Oct. 25 - Terriers terrified**

As always, the crosstown rivalry was in full swing as the two teams battled for conference supremacy. The Terriers were facing Madaus for the first time, and found out why she was named America East Rookie of the Year as they were downed 3-0. Madaus was inundated by 17 BU penalty corners, but worked well with the dominating NU defense to stifle every chance.

- **# 7: Oct. 28 - McHugh's stroke ends scare at Harvard**

Although they would have to compete on Harvard's grass field, the players seemed unconcerned about facing the Crimson, a .500 team. But All-American Crimson scorer Nancy Collins answered NU's only tally in the first half, and the game was hotly contested from then on. Madaus was forced to make four big saves in the second period and two overtimes, before a 1-1 tie took both teams to a penalty stroke showdown. With the strokes tied at 4-4, only Hilary McHugh was left to shoot, and she came through with one of her six game-winning goals to give NU a hard-fought 2-1 win.

- **# 6: Nov.1 - Delaware defeated in battle for No. 1 seed**

From the start of the season, Delaware looked at one date: November 1st. The path to national recognition would go through Northeastern's intimidating Parsons Field. With each team suffering just one defeat in conference play , the regular season finale would determine America East's top seed. Two mid-game goals by Hilary McHugh and Heidi Benson gave goalkeeper Kathleen Madaus a comfortable cushion on which to record her eighth shutout of the season, securing the top spot for NU.

- **# 5: Nov. 6 - Fighting Blue Hens fall in playoff rematch**

In an ironic twist of fate, Delaware and NU were rematched in the very next game, the semifinals of the America East Tournament. For all the naysayers following the first contest, McHugh collected both NU goals on penalty corners, as the Huskies inched past Delaware 2-1.

- **# 4: Oct. 4 - "Duchemin has scored for Northeastern!"**

With one minute remaining in the first half, the Huskies were involved in a scoreless tie with Old Dominion, the No. 1 team in the nation. Getting the ball just inside the circle, Hilary McHugh let fly with a blast from straight out. The shot was headed right at ODU's Jamie Hill before Krisanne Duchemin deftly redirected it past the surprised netminder.

- **# 3: Nov. 11 - Coach Murtagh gets the call**

On the outside edge of the rankings bubble, Coach Murtagh and her Huskies were doubtful that an NCAA postseason bid would come their way. Their mindsets changed 180 degrees when Murtagh learned that NU had been selected to take on UNC in the first round the following weekend.

- **# 2: Sept. 23 - Huge win for Huskies on the Hill**

A 1-5 record to open the season was not what NU fans expected from their perennially ranked field hockey team. After disheartening back-to-back home losses, the Huskies refocused for a match at Boston College, one of the nation's top teams. Facing 14 penalty corners and forced to make eight saves, rookie goalie Kathleen Madaus earned the first of eight shutouts on the season, launching NU to 12 wins in its next 13 games.

- **# 1: Oct. 4 - Huskies' dominion is Monarchs' demise**

Following Duchemin's deflection to put NU up 1-0 at the half, NU went into a defensive shell to try to stop the top-ranked Old Dominion Monarchs. Outshot 10-0 and outcornered 6-0 in the second half, the Husky defense stayed tight. ODU pulled goalie Jamie Hill with ten minutes remaining, desperate to score the equalizer. But Madaus stayed solid, stopping six shots to secure another shutout win, the biggest of the season. Old Dominion eventually won the national title, but this day belonged to NU!

AMERICA EAST

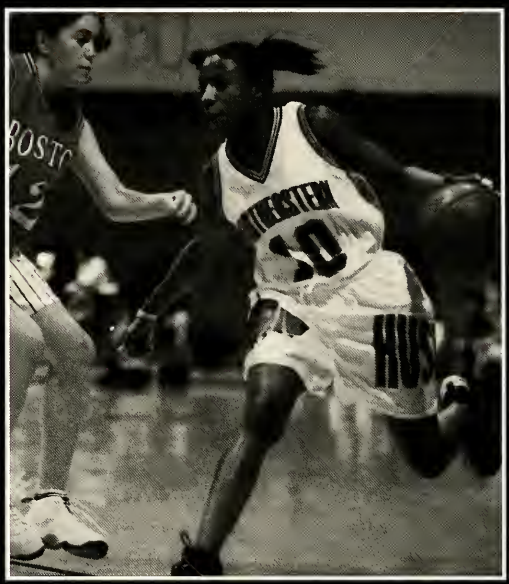
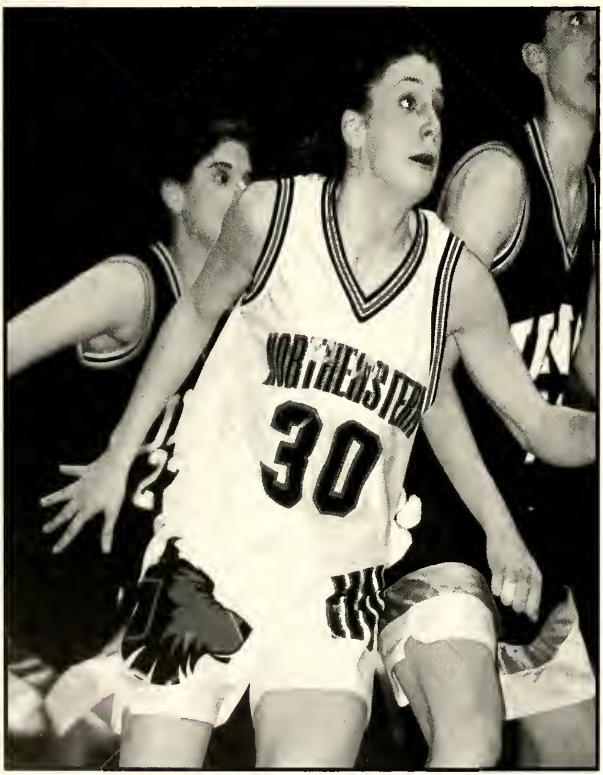
In their first ever NCAA tournament, the Huskies (22-8) proved they had the mettle to keep up with the best teams in the country.

They had the intensity, the discipline and the defense. But in the end it was a lack of offensive power that hurt the Huskies in the NCAA Tournament vs. North Carolina.





(Top) Tinsley (10) takes the ball down the court (Photo by James Nash, NU News) **(above left)** DiMaria (30) anticipates the next play (Photo from Sports Information), **(above right)** Palecek (42) looks to pass the ball (Photo from Sports Info.)

Huskies to the Dance!

NU falls in NCAA game

The women's basketball team went to the NCAA Tournament for the first time and nearly upset North Carolina, losing 64-55, despite leading for most of the game. The Huskies advanced to the Big Dance after winning the America East Championship over top seed Maine on March 6, 57-55. Betsy Palecek made the winning basket with six seconds to go on a pass from Tournament Most Outstanding Player Tesha Tinsley. Palecek had a game-high 22 points to lead NU against UNC.

Youth leads NU into Year 2000

• Story by NU Sports Info. & Pictures by NU News Photographers

With 20 underclassmen on the roster of the Northeastern men's ice hockey team, inexperience was its Achilles' heel throughout a somewhat frustrating season. However, the Huskies should lose only senior Brent Thomas for a refocused run next year, and the balance of their fortunes will be paced by the development of the core of younger players. Freshmen Jim Fahey and Willie Levesque recorded outstanding first-year campaigns for the Northeastern squad, and earned berths on Hockey East's elite All-Rookie Team to match sophomore Brian Cummings' honor after last season. Though not so acknowledged, centerman Chris Lynch had an equally impressive rookie showing and finished third on the team in points with 24. Sophomores Graig Mischler and Mike Jozefowicz bettered their own strong initial seasons, and appear poised to lead the offense and defense, respectively.

Seniors Skated to Success

Rounding out another impressive season for Northeastern's most consistently strong squad, the women's ice hockey team compiled a 25-7-3 overall record including wins over traditional powerhouses Brown, New Hampshire, and Providence. A loss to UNH in the ECAC semifinal anticlimactically closed out the careers of four veteran Husky skaters. Longtime defensive anchor Jaime Totten captained the squad the past two seasons, leading by example at both ends of the ice. Hailing from Alaska, scrappy forward Sarah Smythe was a purebred Husky. Offensive-minded Kathy Waldo spent four years deflecting cystic fybrosis like a mere opposing check. And netminder Shannon Meyers was the stabilizing force in net, establishing new school records in almost every goaltending category. The quartet led NU to a 92-37-13 record over four seasons, a bid in the first-ever national tournament, and an ECAC championship. • Story provided by NU Sports Info.

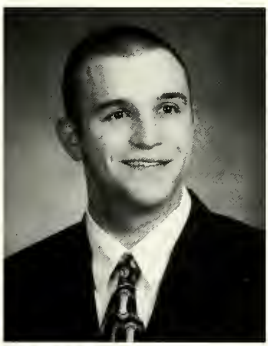
Mom, Dad, Mike, Dan, Maureen, Gerry



Jeremy Labrie

You have never failed to make us beam with pride in all you've ever done. And now, our pride is greater than ever. No matter what you do in life, you will always have our love and blessing.
We love you!
Mom, Dad, Jen, Nan,
Grandpa and Lisa.

Congratulations

"Laura"

We are so proud of you !!
After spending six years in the Navy you desided to go to college. It's been a hard struggle, but you made it !!

With all our Love,
Mom, Dad, Andy, Susan & Chris

Amy Lobacz

Amy,
Expect the Best!
Love, Dad

Michael Melcer

Dear Michael,

You have made us so proud... in your scholastic achievements, your warmth & personality, and your strength of character.

We love you,
Mom, Dad, & Lori

Yasemin Nisanci

Dear Yasemin,

Thank you for your friendship and support.
I will cherish all our good memories.

Sincerely,
Pia

Elyse Unruch

We are so proud of you. You have achieved so much in just a few years away at school.
You are an inspiration to your sisters.
We wish you much more success and happiness in the future.

Love,
Dad, Ilene and Dani

Eric Woodard

Congratulations, Eric!

We are very proud of you. Our best wishes to you for a happy and successful future.

Love,
Mom, Dad, Ryan and Bret

Mary Geralynn Hidalgo

Gongratulations!

We are so proud of you.

We love you!
Dad, Mom, Lolo, Lola and Joe

Ryan Provencher

Congratulations, *on all your accomplishments.*
Dive in and follow your dreams.
We Love You,
Mom, Dad, and Ed

Jeffrey J. McManus

"Don't worry about it."
May you live a long life full of gladness and health, With a pocket of gold, as the least of your wealth. May the dreams you hold dearest, be those which come true. The kindness you spread, keeps returning to you. May the friendships you make, be those which endure. And all of your gray clouds, be small ones for sure.
Love, Mum

Kerri A. Foxon

We have always been proud of your accomplishments, but more importantly, we have always been proud of who you are.

Love You Princess,
Nana & Grampy

George Gal

Congratulations on all of your accomplishments. We are so proud of you. Keep up the good work and hang on to your dreams! We Love You! Mom, Dad and Lisa

MATTHEW ABBOUD

Congratulations,
Matt!
We are very proud
of you.

Love,
Mom and Dad

ADAM THOMAS

Congratulations,
we always knew
you were SUPER!

Love,
Mom , Dad and Bon

DILANI YOGARATNAM

Congratulations, Dilani
We are very proud and delighted.
With Our Love Always,
Amma, Grandma, Dad, Mom,
Dinesh and Dimitri

"The Purpose of Life is the
expansion of happiness"
- Maharishi Mahesh Yogi

SHAMELESS PLUGS

JOHN D. WICKHAM

We are all so proud of you.
You are an inspiration to all those who know
you and love you.
Congratulations!
En Carpe Diem and Semper Fi.

Love
Mom, Dad, Kelly and Bobby

NIGEL D. THOMAS

Congratulation Nigel, you are a wonderful son. It has been five years, and I can remember crying from Boston to New York.
Nigel, we are proud of you. We know with your determination and perserverance, you will reach the top. May God bless you and protect you in life's journey. Once again, congratulations and best wishes from your loving parents.

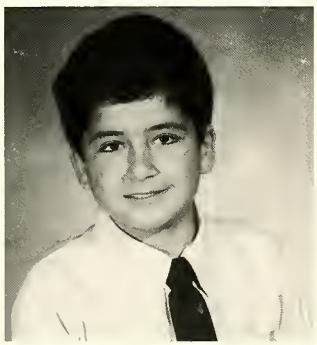
Sandra & Richard

Tara Gardino

Congratulations Tara!

We are very proud of all you accomplished. We realized as a little girl growing up that you were special. Remembering those talented and gifted programs you were enrolled in year after year -- second best was never good enough. You always had to be Number One -- the leader. We wish you all the luck, happiness and success in the world.

Love,
Dad, Mom and Jess.



Robert Darius Boroujerdi

Dear Bob, Congratulations.
You made us very happy and proud. You have instilled in us a pride that cannot ever be taken away. Hard work, determination and good judgement have brought you to where you are. Continue to be yourself.
Love,
Mom, Dad and Mazy

Stacey Beth Zuckerman

Schtay, you have become 1 incredible young lady. You have been a role model in our family since you were born, and you have continued through your entire life. We are so very proud of you. Follow your dreams and we are sure you will succeed in accomplishing them.

We love you always,
Mom, Dad, Tyler, Amanda, Zeus, Andie, etal.

The Power of Internet Recruiting

The Perfect Site For Your Career

Webhire is a software company that designs, develops, builds and operates a suite of web based applications to facilitate e-commerce. Some of these applications are used by corporate customers to source and manage job candidates, by our media partners, e.g., The Washington Post, to host their on-line career sites, and by major Internet portals such as Yahoo, Excite, etc. as part of their career sections. These applications combined account for several million page hits per day and our volume grows daily.

Current applications exist on a variety of platforms and are implemented using a variety of technologies. We are looking for people who will move our current applications to the next generation of scalable, robust and cost effective architecture.

Our work environment is casual, yet exciting and dynamic. Webhire is a profitable, public, internet/web based software company with an exceptional customer base. We are developing an elite team of professionals interested in the opportunity to make things happen in the world of e-commerce.

We offer a competitive salary; medical/dental coverage; 401(k) program; employee stock purchase program, incentive bonus plan and stock option program; flex-time, health club and PC purchase program; 3 weeks vacation, company concierge services, charity events, health clinics, book fairs, sporting events, barbecues, and numerous other social events.

The following opportunities are available to candidates with knowledge of the latest software tools and actual experience pushing the technological, informational and e-commerce envelope:

Sr. UNIX Systems Administrator

Principal Level Software Engineer

System Architect - Web Technologies

Principal Software QA Engineer

Software QA Engineer

Business Development Reps (4 assignments)

Sr. Financial Analyst/Manager

Marketing Manager - Internet Products

INTERTECH • INTERTECH • INTERTECH

INTERTECH
ENGINEERING
ASSOCIATES
INC

INTERTECH provides product specification, design, development, verification and validation services to a number of industries. Our strengths lie in the development of software driven electronic real time, mission critical products such as medical instrumentation, industrial monitoring and control systems, and communications equipment.

Unlike traditional engineering jobs for product based companies, **INTERTECH** offers a fast paced, entrepreneurial atmosphere. Projects average around 6 months in duration, so our engineers are exposed to a wide variety of cutting edge technology in a compressed time frame.

Founded in 1982, **INTERTECH** has grown continuously. We always look actively for highly skilled graduates in Computer Science or Electrical Engineering. Positions are available for staff, senior, and principal engineers for hardware and software development. Our Software QA group is also recruiting for staff and senior Software QA Engineers.

For more information, visit us at ***www.inea.com***, call us at 781-255-9696 or fax your resume to 781-255-1980.

You're not the only one reading this ad right now... but you may be the BEST one.

You're looking for a job requiring your skills and capabilities, and a company willing to compensate you for using them. We're looking for individuals qualified to fill our jobs, and motivated to exceed expectations.

Welcome to ITDS, the second largest biller of wireless telecommunications in the world. We're a billing and management information systems software provider handling over 21.5 billion calls per year. We may not be the only company who could benefit from your skills...but we may be the best one.

Ames

Ames is the nation's largest regional discount retailer doing over $4+ billion in annual sales and is operational in over 450 locations in 19 states across the Northeast, Mid-Atlantic, and Mid-West.

Our Corporate Office Training Program is a formal 26-week program that couples comprehensive classroom seminars and on-the-job training designed to provide you with an understanding of the fundamentals of retail and orient you with Ames. Through all phases of your training, you"ll work with a mentor, Buyers, Managers, Directors, and Senior Management to gain the skills and knowledge you'll need to begin your career in Buying, Finance, Allocation or Information Systems. Upon successful completion of the program you will be placed in a permanent assignment in the Ames Corporate Office.

If you are going to be graduating in the spring of 2000 and are interested in getting additional information or would like to schedule an interview please contact Marc Dobbins at (860) 257-5248.

If you are a graduate of Northeastern University and you have previous work experience and are interested in a career in Finance, IS, Buying, or Allocation, please contact Alyson

For additional information please visit our website at ***www.amesstores.com.***

Right Here Right Now!

You've made it!
You're a Nurse.

SHAMELESS PLUGS

A dull axe requires great strength; be wise and sharpen the blade.

~Timothy R. Erickson quoting Ecclesiastes 10:10

Laughter is the most important form of medicine. Without it, the heart would never heal.
~ Stacey Bortlik

QUOTE

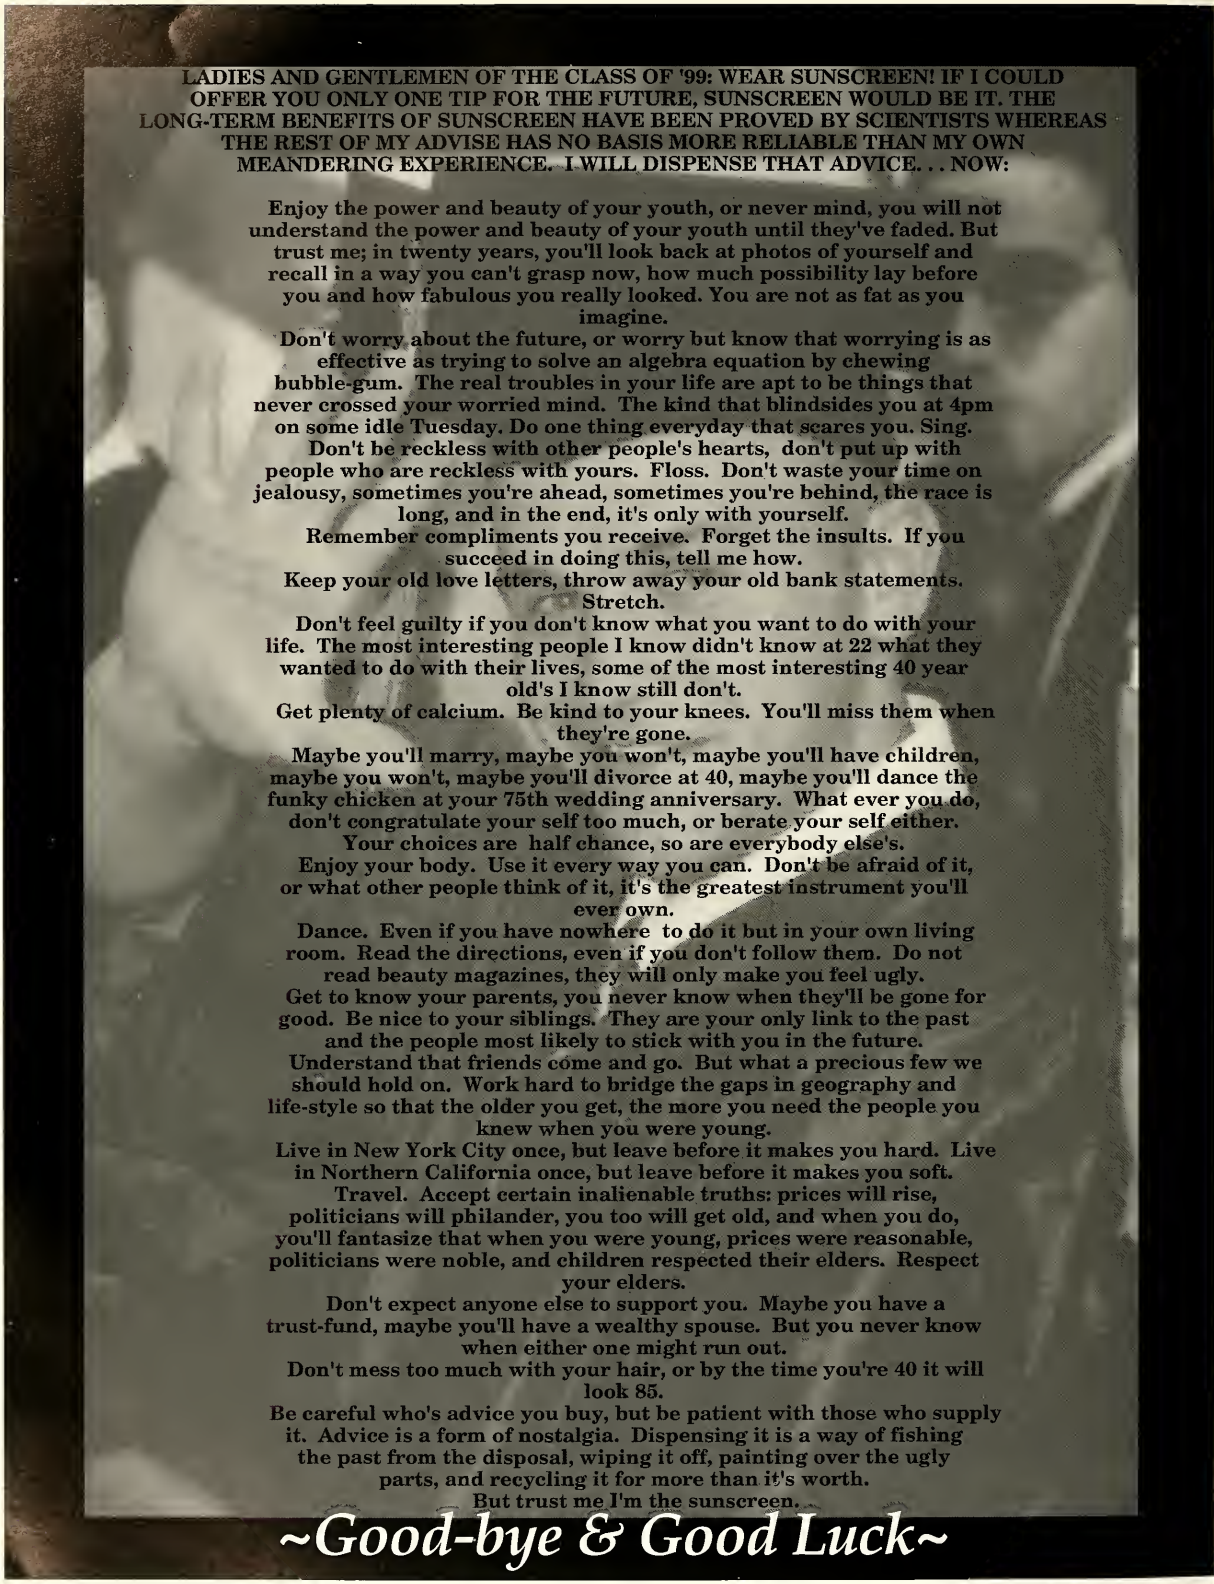
Our only limitations are the ones we set for ourselves.

~Ryan Haberthur

UNQUOTE

"Believe with all your heart and God will make it happen."
~Karen Perrotti

"Today well lived, makes yesterday a dream of happiness and tomorrow a vision of hope."
~Daniele DelBuono



LADIES AND GENTLEMEN OF THE CLASS OF '99: WEAR SUNSCREEN! IF I COULD OFFER YOU ONLY ONE TIP FOR THE FUTURE, SUNSCREEN WOULD BE IT. THE LONG-TERM BENEFITS OF SUNSCREEN HAVE BEEN PROVED BY SCIENTISTS WHEREAS THE REST OF MY ADVISE HAS NO BASIS MORE RELIABLE THAN MY OWN MEANDERING EXPERIENCE. I WILL DISPENSE THAT ADVICE. . . NOW:
Enjoy the power and beauty of your youth, or never mind, you will not understand the power and beauty of your youth until they've faded. But trust me; in twenty years, you'll look back at photos of yourself and recall in a way you can't grasp now, how much possibility lay before you and how fabulous you really looked. You are not as fat as you imagine.
Don't worry about the future, or worry but know that worrying is as effective as trying to solve an algebra equation by chewing bubble-gum. The real troubles in your life are apt to be things that never crossed your worried mind. The kind that blindsides you at 4pm on some idle Tuesday. Do one thing everyday that scares you. Sing.
Don't be reckless with other people's hearts, don't put up with people who are reckless with yours. Floss. Don't waste your time on jealousy, sometimes you're ahead, sometimes you're behind, the race is long, and in the end, it's only with yourself.
Remember compliments you receive. Forget the insults. If you succeed in doing this, tell me how.
Keep your old love letters, throw away your old bank statements.
Stretch.
Don't feel guilty if you don't know what you want to do with your life. The most interesting people I know didn't know at 22 what they wanted to do with their lives, some of the most interesting 40 year old's I know still don't.
Get plenty of calcium. Be kind to your knees. You'll miss them when they're gone.
Maybe you'll marry, maybe you won't, maybe you'll have children, maybe you won't, maybe you'll divorce at 40, maybe you'll dance the funky chicken at your 75th wedding anniversary. What ever you do, don't congratulate your self too much, or berate your self either.
Your choices are half chance, so are everybody else's.
Enjoy your body. Use it every way you can. Don't be afraid of it, or what other people think of it, it's the greatest instrument you'll ever own.
Dance. Even if you have nowhere to do it but in your own living room. Read the directions, even if you don't follow them. Do not read beauty magazines, they will only make you feel ugly.
Get to know your parents, you never know when they'll be gone for good. Be nice to your siblings. They are your only link to the past and the people most likely to stick with you in the future.
Understand that friends come and go. But what a precious few we should hold on. Work hard to bridge the gaps in geography and life-style so that the older you get, the more you need the people you knew when you were young.
Live in New York City once, but leave before it makes you hard. Live in Northern California once, but leave before it makes you soft.
Travel. Accept certain inalienable truths: prices will rise, politicians will philander, you too will get old, and when you do, you'll fantasize that when you were young, prices were reasonable, politicians were noble, and children respected their elders. Respect your elders.
Don't expect anyone else to support you. Maybe you have a trust-fund, maybe you'll have a wealthy spouse. But you never know when either one might run out.
Don't mess too much with your hair, or by the time you're 40 it will look 85.
Be careful who's advice you buy, but be patient with those who supply it. Advice is a form of nostalgia. Dispensing it is a way of fishing the past from the disposal, wiping it off, painting over the ugly parts, and recycling it for more than it's worth.
But trust me I'm the sunscreen.
~Good-bye & Good Luck~
